30	91
قطعة (الجزء الثاني)	سؤال مع الشرح

الجزء الثاني: 30 قطعة قراءة من بعد أول 40 قطعة في الترتيب، كما وردت في تجميعات المختبرين، مرتبة من الأكثر ذكرًا، ومع كل سؤال الإجابة وسببها من القطعة نفسها.

ملف مجاني من تطبيق ستيب

آخر تحديث: 21 أكتوبر 2026

انضم لقناة التطبيق على تليجرام (اختبار يومي مجاني): t.me/step_tajmeeat

كيف تستخدم الملف؟ وكيف تحل أسئلة القراءة؟

1 هذا هو الجزء الثاني

الجزء الأول فيه أول 40 قطعة في الترتيب (الأكثر تكرارًا). هذا الملف يكمل بعدها: القطع من 41 إلى 70 حسب عدد مرات ذكرها في تقارير المختبرين. اقرأ القطعة مرة سريعة، ثم حل أسئلتها، ثم صحّح من الإجابات اللي تحتها مباشرة.

2 الفكرة الرئيسية Main idea

أسئلة مثل What is the main idea أو best title: اقرأ أول جملة في كل فقرة. الإجابة الصحيحة تغطي القطعة كلها (أو الفقرة المطلوبة)، والخيارات الغلط تكون تفصيلة صغيرة أو فكرة أوسع من القطعة.

3 التفاصيل Detail

أسئلة مثل According to paragraph و What does the passage say: خذ كلمة مميزة من السؤال (اسم، رقم، سنة) وابحث عنها في القطعة، ثم اقرأ الجملة اللي فيها كاملة. الإجابة الصحيحة غالبًا نفس المعنى بكلمات ثانية.

4 معنى الكلمة Vocabulary

أسئلة closest in meaning to: ارجع للكلمة في الفقرة، واقرأ الجملة قبلها وبعدها، ثم ضع كل خيار مكان الكلمة؛ الخيار اللي يحافظ على معنى الجملة هو الصحيح.

5 الضمير يعود على ماذا؟ Reference

أسئلة The word it / they / his refers to: ارجع للخلف وابحث عن أقرب اسم قبل الضمير يناسبه في العدد (مفرد أو جمع) والمعنى، وجرّب تضعه مكان الضمير.

6 الاستنتاج Inference

أسئلة What can we understand و fact or opinion: الإجابة غير مكتوبة حرفيًا لكنها تُفهم من القطعة بوضوح. ارفض أي خيار يضيف معلومة غير موجودة. والرأي opinion هو كلام يحتمل الاختلاف مثل I believe أو suggest، والحقيقة fact رقم أو حدث يمكن التأكد منه.

تبي تتدرب أكثر؟ في تطبيق «ستيب STEP: تجميعات متكررة» مئات القطع والأسئلة من نفس التجميعات، مع شرح عربي لكل سؤال واختبارات تجريبية ومتابعة لأخطائك.

أرقام الصفحات هي الأرقام المكتوبة أسفل كل صفحة. «مرات ذكرها» = عدد مرات ذكر القطعة في تقارير المختبرين. هذه القطع تأتي في الترتيب بعد أول 40 قطعة (الجزء الأول)، ومرتبة من الأكثر تكرارًا إلى الأقل.

01

استراتيجيات التسعير
Pricing Strategies (Passages A and B)

ذكرها المختبرون 31 مرة

1 سؤال

Passage A: Customer Value-Based Pricing

(1) The price a company charges will fall somewhere between one that is too high to produce any demand and one that is too low to produce any profit.

(2) In the end, the customer will decide whether a product's price is right. Pricing decisions, like other marketing mix decisions, must start with customer value. When customers buy a product, they exchange something of value (the benefits of having or using the product). Effective, customer-oriented pricing involves understanding how much value consumers place on the benefits they receive from the product and setting a price that captures this value.

(3) Customer value-based pricing uses buyers' perceptions of value, not the seller's cost, as the key to pricing. Value-based pricing means that the marketer cannot design a product and marketing program and then set the price. Price is considered along with the other marketing mix variables before the marketing program is set.

(4) Although costs are an important consideration in setting prices, cost-based pricing often product driven. The company designs what it considers to be good product, adds up the cost of making the product, and sets a price that covers costs plus a target profit. Marketing must then convince buyers that the products value at that price justifies its purchase. If the price turns out to be too high, the company must settle for lower markups or lower sales, both resulting in disappointing profits.

Passage B: Good-Value Pricing

(1) Recent economic events have caused a fundamental shift in consumer attitudes towards price and quality. In response, many companies have changed their pricing approaches to bring them into line with changing economic conditions and consumer price perceptions. More and more, marketers have adopted good-value pricing strategies-offering just the right combination of quality and good service at a fair price.

(2) In many cases, this has involved introducing less-expensive versions of established, brand-name products. To meet the tougher economic times and more frugal consumer spending habits, fast-food restaurants such as Taco Bell and McDonald's offer value meals and dollar menu items. Armani offers less-expensive, more casual Armani Exchange fashion line. Alberto-Culver's TRESemme hair care line promises 'A salon look and feel at a fraction of the price.' And every car company now offers small, inexpensive models better suited to the strapped consumer's budget.

(3) In other cases, good-value pricing has involved redesigning existing brands to offer more quality for a given price or the same quality for less. Some companies even succeed by offering less value but at rock bottom prices. For example, passengers flying low-cost European airline Ryanair won't get much in the way of free amenities, but they'll like the airline's unbelievably low prices.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

تفاصيل

1 **According to passages A and B, what role do marketers play in pricing?**

A setting fair prices.

B designing products then setting the price.

C justifying the price and offering good quality products for a fair price.

D redesigning some products to offer more quality products for lower prices.

01 الإجابات مع الشرح

1 **C justifying the price and offering good quality products for a fair price.**

السبب القطعة A تقول إن التسويق يقنع المشتري بأن قيمة المنتج تبرر سعره، والقطعة B تقول إن المسوقين يقدمون جودة وخدمة جيدة بسعر عادل؛ الخيار C يجمع الدورين.

> *Marketing must then convince buyers that the products value at that price justifies its purchase ... marketers have adopted good-value pricing strategies-offering just the right combination of quality and good service at a fair price*

ليه الباقي غلط A و D كل واحد منهما جزء من الصورة فقط، و B هو بالضبط ما تقول القطعة A إنه لا يصح في التسعير حسب القيمة.

02

إدارة المخزون
Inventory Management

ذكرها المختبرون 31 مرة

4 سؤال

Inventory Management

(1) Inventory, or the amount of material a company holds, can affect customer satisfaction. Here, managers must maintain the delicate balance between carrying too little inventory and carrying too much. With too little stock, the firm risks not having products which customers want to buy. To remedy this, the firm may need costly emergency shipments or production. Carrying too much inventory results in higher-than-necessary inventory-carrying costs and out-of-date stock. Thus, in managing inventory, firms must balance the costs of carrying larger inventories against resulting sales and profits.

(2) Many companies have greatly reduced their inventories and related costs through just-in-time logistics systems. With such systems, producers and retailers carry only small inventories of parts or merchandise, often only enough for a few days of operations. New stock arrives exactly when needed, rather than being stored in inventory until being used. Just-in-time systems require accurate forecasting along with fast, frequent and flexible delivery so that new supplies will be available when needed. However, these systems result in substantial savings in inventory-carrying and handling costs.

(3) Marketers are always looking for new ways to make inventory management more efficient in the not-too-distant future. Handling inventory might even become fully automated. For example, smart tag technology by which small transmitter clips are embedded or placed on products and packaging on everything from flowers and razors to tires. Smart products could make the entire supply chain-which accounts for nearly 75 percent of a product's cost—intelligent and automated.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

2 What do firms do to avoid keeping higher than necessary inventories? تفاصيل

A They balance the costs against the sales and profits.
B They reduce their costs through logistics systems.
C They call customers to determine their needs.
D They make their inventories automated.

3 Which word can we use to replace "Thus" in paragraph (1)? تفاصيل

A Particularly B However C Therefore D though

ملف مجاني من تطبيق ستيب — Google Play و App Store

4 استنتاج

Why does the writer use the word "However" in Paragraph (2)?

- **A** To show that just-in-time systems are actually useful.
- **B** To explain the process of just-in-time systems
- **C** To give an example of just-in-time systems.
- **D** To list the benefits of just-in-time systems

5 استنتاج

How does the writer feel about the future of inventories?

- **A** He believes future inventories will cost more.
- **B** He believes future inventories will require more forecasting.
- **C** He believes future inventories will make customers happier.
- **D** He believes future inventories will soon be smarter and fully automated.

02 الإجابات مع الشرح

2 **A** They balance the costs against the sales and profits.

السبب: الفقرة 1 تختم بأن الشركات يجب أن توازن تكلفة المخزون الكبير مقابل المبيعات والأرباح.

> *firms must balance the costs of carrying larger inventories against resulting sales and profits*

ليه الباقي غلط: just-in-time والأتمتة مذكورة في فقرات أخرى كطرق جديدة، وليست جواب الفقرة 1.

3 **C** Therefore

السبب: Thus = لذلك، وأقرب كلمة لها Therefore.

> *Thus, in managing inventory*

ليه الباقي غلط: However و though للتعارض، و Particularly = خصوصًا.

4 **A** To show that just-in-time systems are actually useful.

السبب: قبل However ذكر الكاتب أن النظام يحتاج توقعات دقيقة وتوصيل سريع (صعوبات)، ثم قال «لكن» هذه الأنظمة توفر كثيرًا؛ يعني هي مفيدة فعلًا.

> *However, these systems result in substantial savings in inventory-carrying and handling costs.*

5 **D** He believes future inventories will soon be smarter and fully automated.

السبب: الفقرة 3 تتكلم عن المستقبل: إدارة المخزون قد تصبح آلية بالكامل، والمنتجات «الذكية» تجعل سلسلة الإمداد ذكية وآلية.

> *Handling inventory might even become fully automated ... intelligent and automated*

ستيب STEP: تجميعات متكررة

03 التحكم في المخزون (كوكاكولا)
Inventory Control

ذكرها المختبرون 29 مرة
4 سؤال

(1) Can you imagine what would happen if a Coca-Cola manufacturing plant ran out of the company's familiar red-and-white aluminum cans? It would be impossible to complete the manufacturing process and ship the cases of Coke to retailers.

(2) Management would be forced to shut the assembly line down until the next shipment of cans arrived from a supplier. In reality, operations managers for Coca-Cola realize the disasters that a shortage of needed materials can cause and will avoid this type of problem if at all possible. The simple fact is that shutdowns are expensive because costs such as rent, wages, insurance, and other expenses still must be paid.

(3) Operations managers are concerned with three types of inventories. A raw-materials inventory consists of materials that will become part of the product during the production process. The work-in-process inventory consists of partially completed products. The finished-goods inventory consists of completed products. Each type of inventory also has a holding cost, or storage cost, and a stock-out cost – the cost of running out of inventory.

(4) Inventory control is the process of managing inventories in such a way as to minimize inventory costs, including both holding costs and potential stock-out costs.

(5) Today computer systems are being used to keep track of inventories and warn managers of possible stock-outs. One of the most sophisticated methods of inventory control used today is materials requirements planning.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

6 What is one important cause of shutdown? — تفاصيل

A poor computer system
B high storage costs
C unskilled workers
D shortage of materials

7 What is one important effect of inventory control? — تفاصيل

A It creates better managers.
B It reduces costs.
C It develops skills.
D It improved product quality.

8 The word "familiar" in paragraph (1) is closest in meaning to _____ — معنى كلمة

A attractive
B normal
C missing
D well-known

ملف مجاني من تطبيق ستيب — Google Play و App Store

معنى كلمة

9 The word “methods” in paragraph (5) is closest in meaning to _____

A surprises B reasons C ways D varieties

03 الإجابات مع الشرح

6 **D shortage of materials**

السبب: الفقرة 2: الإدارة تضطر لإيقاف خط الإنتاج حتى تصل العلب، والسبب نقص المواد.

the disasters that a shortage of needed materials can cause

7 **B It reduces costs.**

السبب: الفقرة 4 تعرّف التحكم في المخزون بأنه إدارة المخزون بطريقة تقلل التكاليف.

managing inventories in such a way as to minimize inventory costs

8 **D well-known**

السبب: familiar = مألوف ومعروف للجميع، أي well-known؛ علب كوكاكولا الحمراء والبيضاء يعرفها الكل.

the company’s familiar red-and-white aluminum cans

9 **C ways**

السبب: methods = طرق، أي ways.

One of the most sophisticated methods of inventory control

ستيب STEP: تجميعات متكررة

04 ألوان النجوم والنجوم العملاقة
Stars (Colors and Superstars)

ذكرها المختبرون 28 مرة
4 سؤال

If we look at the night sky carefully, we will see that the stars are of many different colors. Some are red, others are yellow and some are blue. This is also shown when we take color photographs of the night sky. You can take such a photograph with an ordinary camera as long as it is kept steady. A thirty second exposure is sufficient. Astronomers have been able to classify stars according to color. They have found that blue stars are the largest and red stars the smallest. However, there are a few stars which cannot be classified in this way. These are the superstars. For example, Ryiejol is a blue superstar as big as 40,000 suns and Beetlejuice is a superstar with a size equal to 17,000 suns. Suppose an astronomer observes two stars, one brighter than the other. If neither of them is a superstar, he will know immediately that the brighter star is closer. Astronomers have instruments like light meters which can measure the brightness of a star quite accurately. It is possible to measure a star's distance from the Earth if astronomers know the color, brightness and whether or not it is a superstar.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

10 Which of the following colors is NOT mentioned in the passage? — تفاصيل

A green B yellow C blue D red

11 According to the passage, Beetlejuice is a superstar _____ — تفاصيل

A as big as the sun
B smaller than the sun
C as big as 17,000 suns
D as big as 40,000 suns

12 The pronoun it in Paragraph (1) refers to the _____ — مرجع الضمير

A photograph B exposure C camera D star

13 The word brighter in Paragraph (3) is closest in meaning to _____ — معنى كلمة

A more colorful B more shiny C smaller D larger

04 الإجابات مع الشرح

10 A green

السبب: الألوان المذكورة: أحمر وأصفر وأزرق فقط، ولا ذكر للأخضر.

Some are red, others are yellow and some are blue.

ملف مجاني من تطبيق ستيب — Google Play و App Store

11 **C** as big as 17,000 suns

السبب القطعة تقول إن Beetlejuice حجمه يساوي 17,000 شمس.

Beetlejuice is a superstar with a size equal to 17,000 suns

ليه الباقي غلط 40,000 شمس هو حجم النجم الآخر Ryiejol.

12 **C** camera

السبب القطعة هنا مطبوعة فقرة واحدة كما في التجميعات؛ الضمير it في جملة الكاميرا: الشيء الذي يجب أن يبقى ثابتًا أثناء التصوير هو الكاميرا.

You can take such a photograph with an ordinary camera as long as it is kept steady.

13 **B** more shiny

السبب الكلمة في جملة الراصد الذي يرى نجمين (القطعة مطبوعة فقرة واحدة): brighter = أكثر لمعانًا وإضاءة، أي more shiny.

one brighter than the other

ليه الباقي غلط السطوع ليس اللون ولا الحجم.

ستيب STEP: تجميعات متكررة

05

المركنتيلية والميزة المطلقة
Mercantilism and Absolute Advantage

ذكرها المختبرون 27 مرة

3 سؤال

Passage A: Mercantilism

(1) Developed in the sixteenth century, mercantilism was one of the earliest efforts to develop an economic theory. This theory stated that a country's wealth was determined by the amount of its gold and silver holdings. In its simplest sense, mercantilists believed that a country should increase its holdings of gold and silver by promoting exports and discouraging imports. In other words, if people in other countries buy more from you (exports) than they sell from you (imports), then they have to pay you the difference in gold and silver. The objective of each country was to have a trade surplus, or a situation where the value of exports is greater than the value of imports, and to avoid a trade deficit, or a situation where the value of imports is greater than the value of exports.

(2) A closer look at world history from the 1500s to the late 1800s helps explain why mercantilism flourished. The 1500s marked the rise of new nations-states, whose rulers wanted to strengthen their nations by building larger armies and national institutions. By increasing exports and trade, these rulers were able to amass more gold and wealth for their countries. One way that many of these new nations promoted exports was to impose restrictions on imports. This strategy is called protectionism and is still used today.

Passage B: Absolute Advantage

(1) In 1776, Adam Smith questioned the leading mercantile theory of the time in The Wealth of Nations. Smith offered a new trade theory called absolute advantage, which focused on the ability of a country to produce a good more efficiently than another nation. Smith reasoned that trade between countries shouldn't be regulated or restricted by government policy or intervention. He stated that trade should flow naturally according to market forces. In a hypothetical two-country world, if Country A produce a good cheaper or faster (or both) than Country B, then Country A had the advantage and could focus on specializing on producing that good. Similarly, if Country B was better at producing another good, it could focus on specializing at well. By specialization, countries would generate efficiencies, because their labor force would become more skilled by doing the same tasks. Production would also become more efficient, because there would be an incentive to create the specialization. Smith's theory reasoned that with increased efficiencies, people in both countries would benefit and trade should be encouraged. His theory stated that a nation's wealth shouldn't be judged by how much gold and silver it had but rather by the living standards of its people.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

14 تفاصيل

Which theories believe that a nation's wealth is the same as its gold and silver?

A Mercantilism only
B Promoting exports only
C Absolute advantage only
D Mercantilism and absolute advantage

15 تفاصيل

Which of the theories believe that exports should be higher than imports?

A Mercantilism only
B Absolute advantage only
C Mercantilism and absolute advantage
D Promoting exports and increased efficiencies

16 تفاصيل

Which theories believe that countries should have no limits on imports and exports?

A Mercantilism and absolute advantage
B Protectionism and specialization
C Absolute advantage only
D Mercantilism only

05 الإجابات مع الشرح

14 A Mercantilism only

السبب: المركنتيلية فقط تقيس ثروة الدولة بالذهب والفضة، بينما Adam Smith قال العكس: الثروة تقاس بمستوى معيشة الناس.

> *a country's wealth was determined by the amount of its gold and silver holdings ... a nation's wealth shouldn't be judged by how much gold and silver it had*

15 A Mercantilism only

السبب: هدف المركنتيلية فائض تجاري: الصادرات أكبر من الواردات. نظرية الميزة المطلقة لم تقل ذلك.

> *The objective of each country was to have a trade surplus, or a situation where the value of exports is greater than the value of imports*

16 C Absolute advantage only

السبب: Adam Smith قال إن التجارة لا يجب أن تقيدها الحكومة، بينما المركنتيلية فرضت قيودًا على الواردات (protectionism).

> *trade between countries shouldn't be regulated or restricted by government policy or intervention*

06

مدائن صالح
Mada'in Saleh

ذكرها المختبرون 27 مرة

1 سؤال

The buildings and monuments that we can see today at Mada'in Saleh are remnants of the great and very rich Nabatean Kingdom. Other famous buildings of this civilization are found in northern Syria and in Petra in Jordan, which was the Nabatean capital.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

تفاصيل

17 What does the passage say about Petra?

A It is in northern Syria.

B It is the capital of Jordan.

C It was the Nabatean capital.

D It was a successful commercial city.

06 الإجابات مع الشرح

17 C It was the Nabatean capital.

السبب القطعة تقول إن البتراء في الأردن كانت عاصمة الأنباط.

Petra in Jordan, which was the Nabatean capital

ليه الباقي غلط البتراء في الأردن وليست في سوريا، والقطعة لا تقول إنها عاصمة الأردن.

ستيب STEP تجميعات متكررة

07

تراجع مدينة ديترويت
Urban Decline in Detroit

ذكرها المختبرون 25 مرة

4 سؤال

(1) Detroit was once America's fourth largest city. The city's population increased from about 300,000 in 1900 to 1.8 million in 1950 as the city attracted many workers to work in its car factories. In 1960, it had the highest income per person in the USA. Today, however, more than 40,000 buildings are vacant or not used and property prices have fallen by more than 80%.

(2) Between 1900 and 1950, Detroit had a growing economy. The American car companies, General Motors, Ford, and Chrysler were all located in Detroit, and they manufactured the majority of the cars sold in the US. However, as international competition increased and American car sales decreased, many people lost their jobs in Detroit's car factories. The city had relied too much on one industry. As a result, when the car industry suffered, it also had a negative effect on Detroit's economy. Reduced car sales also meant that there would be less tax money from the city's car companies, which decreased the city's already low government budget.

(3) As the city's car industry became weaker, the number of jobs in the city decreased and unemployment reached 30% by 2013. Over 60% of Detroit's population who work now, do so outside the city. However, there is some hope. Urban farms are appearing in the city. Young people-especially artists and musicians-are moving into Detroit to make use of cheap city spaces. The city is also creating new policies, such as low rents and tax cuts, in order to help attract new businesses back into the city.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

18 What was the reason for low rents and tax cuts? — تفاصيل

A to create urban farms.
B to bring companies to Detroit
C to help artists and musicians
D to make life easier for the poor

19 What did more car factories in Detroit lead to? — تفاصيل

A the best car companies in the world
B change in property prices
C a larger population
D creating a new city.

20 The word "vacant" in paragraph (1) is closest in meaning to _____ — معنى كلمة

A empty
B for sale
C destroyed
D being built

21 The word suffered in Paragraph (2) is closest in meaning to _____ — معنى كلمة

A moved location
B faced trouble
C expanded
D changed

07 الإجابات مع الشرح

18 B to bring companies to Detroit

السبب الهدف من الإيجارات المنخفضة والتخفيضات الضريبية مذكور بعدها: جذب الشركات للمدينة.

> *such as low rents and tax cuts, in order to help attract new businesses back into the city*

19 C a larger population

السبب السكان زادوا من 300,000 إلى 1.8 مليون لأن مصانع السيارات جذبت العمال.

> *The city's population increased from about 300,000 in 1900 to 1.8 million in 1950 as the city attracted many workers to work in its car factories*

20 A empty

السبب vacant = فاضي، والجملة نفسها تشرحها: or not used.

> *more than 40,000 buildings are vacant or not used*

21 B faced trouble

السبب suffered = عانت وواجهت مشاكل؛ الصناعة ضعفت وأثّرت سلبًا على اقتصاد المدينة.

> *when the car industry suffered, it also had a negative effect on Detroit's economy*

08 الأبحاث الممولة من الشركات
Company-Funded Research

ذكرها المختبرون 24 مرة

3 سؤال

(1) A soda company sponsoring nutrition research. An oil company helping fund a climate-related research meeting. Does the public care who's paying for science?

(2) In a word, yes. When industry funds science, credibility suffers. And this does not bode well for the types of public-private research partnerships that appear to be becoming more common as government funding for research and development reduces.

(3) The recurring topic of conflict of interest has made headlines in recent weeks. The National Academies of Science, Engineering, and Medicine have revised its conflict of-interest guidelines following questions about whether members of a recent expert group on GMO's had industry connections or other financial conflicts were not disclosed in the panel's final report.

(4) This indicates how hard it may be for the public to see research as useful when produced with an industry partner, even when that company is just one of several collaborators. What people think of funding sources.

(5) When a research team included an industry partner, the public were generally less likely to think the scientists would consider a full range of evidence and listen to different voices. An industry partner also reduced how much participants believed any resulting data would provide meaningful guidance for making decisions.

(6) You may think that including a diverse array of partners in a research collaboration might remove the negative perceptions that come with industry involvement. But, while including scientists from a nonindustry organization Particularly (a nongovernmental organization) made some difference, the effect was small. Adding a government partner provided no real additional benefit.

(7) Participants who were asked to describe what they thought about the research partnership in their own words said they were skeptical whether an industry partner could ever be trusted to release information that might hurt its profits.

(8) Stories of Pharmaceutical companies conducting less than rigorous clinical trials for the benefit of their marketing departments, or the tobacco industry steadfastly denying the connection between smoking and cancer in the face of mounting evidence, help explain public concern about industry funded science.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

تفاصيل

22 **How are the ideas that "not all evidence is considered" and "not all findings are released" related?**

A Both are part of the tobacco industry's research.
B Not all evidence is considered" is an example of "not all findings are released"
C Both are examples of public opinion about this type of research.
D One represents NGO research and the other company-funded research.

استنتاج

23 **Which of the following is an opinion?**

A They were Skeptical whether an industry partner could ever be trusted to release information that might hurt its profits.
B The National Academies of Science, Engineering and Medicine have revised its conflict-of interest guidelines.
C An industry partner also reduced how much participants believed any resulting data would provide meaningful guidance for making decisions.
D Including scientists from a non-industry organization made some difference, but the effect

استنتاج

24 **How is the public's view about funding science different from the industry's view?**

A The public think that the industry should use their money to do more research.
B The public think that public-private research partnerships work well.
C The public think that government research is less efficient.
D The public think that the industry mainly cares about money.

08 الإجابات مع الشرح

22 **C Both are examples of public opinion about this type of research.**

السبب: الفكرتان من آراء المشاركين في الدراسة: الفقرة 5 (لن يدرسوا كل الأدلة) والفقرة 7 (لن تنشر الشركة ما يضر أرباحها)؛ كلاهما رأي الجمهور في البحث الممول من الشركات.

> *the public were generally less likely to think the scientists would consider a full range of evidence ... they were skeptical whether an industry partner could ever be trusted to release information*

23 **A They were Skeptical whether an industry partner could ever be trusted to release information that might hurt its profits.**

السبب: skeptical = يشكّون؛ هذا شعور ورأي للمشاركين يحتمل الاختلاف. الخيارات الأخرى أحداث ونتائج دراسة يمكن التأكد منها.

> *they were skeptical whether an industry partner could ever be trusted to release information that might hurt its profits*

24 **D** The public think that the industry mainly cares about money.

السبب الجمهور يشك أن الشركة ستنشر ما يضر أرباحها، أي يرى أن همّها الأول المال.

> *could ever be trusted to release information that might hurt its profits*

التضخم المفرط في ألمانيا
Hyperinflation (Weimar Germany)

ذكرها المختبرون 24 مرة

4 سؤال

Hyperinflation

(1) Because Germany had no goods to trade after its defeat in WW1, the Weimar government simply printed money. For Weimar government leaders this seemed an attractive solution. It paid off its debts in the failing German currency, the mark, including war loans of over €2200 million. The great industrialists were able to pay off all their debts as well.

(2) This set off a chain reaction. With so much money in circulation prices and wages rocketed, but people soon realized that this money was useless. Workers needed trolleys to carry home their pay. Wages began to be paid daily instead of weekly. The price of goods could rise between joining the back of a queue in a shop and reaching the front!

(3) While you might think that the poor suffered most, some historians argue that the greatest casualties were middle-class Germans-those with savings. A prosperous middle-class family would find that their savings in the bank, which might have bought them a house in 1921, by 1923 would not even buy a loaf of bread. Pensioners found that their previously adequate monthly pension would not even buy a cup of coffee.

(4) It was clear to all, both inside and outside Germany, that the situation needed urgent action. In August 1923 a new government under Gustav Stresemann took over. He called off the passive resistance in the Ruhr. He called in the useless marks and burned them, replacing them with a new currency-the American-backed Rentenmark. He negotiated to reduce Germany's debt and receive American loans under the Dawes Plan. In addition, Germany repaired relations with its neighbors and reopened trade. With renewed trade and the flow of American dollars, life improved. The economic crisis was solved very quickly. Some historians suggest that this is evidence that many problems were not as severe as its politicians had made out.

(5) It is also increasingly clear, however, that the hyperinflation had done great political damage to the Weimar government. Their right-wing opponents had yet another problem to blame them for, and the movement had lost the support of the middle classes.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

25 معنى كلمة

What phrase other than "economic crisis" does the writer use to describe the problems caused by hyperinflation?

A replacing currency
B political damage
C urgent action
D war loans

ملف مجاني من تطبيق ستيب — Google Play و App Store

استنتاج

26 **Which of the following is an opinion?**

A From 1921-1923 the German middle class DID NOT buy houses
B Workers needed trolleys to carry home their wages
C A new government took power in 1923
D Germany's Problems were NOT as severe as its politicians had said.

استنتاج

27 **How is some historians' view of hyperinflation victims different from the common view?**

A They believe that people who DIDN'T have money suffered.
B They believe that people who had savings suffered most.
C They believe that people were starving in the streets
D They believe other European states suffered more

استنتاج

28 **What can we understand from Paragraph (4) about the solution to the crisis?**

A It hurt Gustav Stresemann's opponents.
B It was very difficult to achieve.
C It depended on American money
D It damaged Germany's relations with its neighbors.

09 الإجابات مع الشرح

25 **B political damage**

السبب في الفقرة 5 يصف الكاتب نتيجة التضخم المفرط بأنه «ضرر سياسي».

the hyperinflation had done great political damage to the Weimar government

26 **D Germany's Problems were NOT as severe as its politicians had said.**

السبب الجملة تبدأ بـ Some historians suggest = بعض المؤرخين يرون؛ أي رأي وليس حقيقة.

Some historians suggest that this is evidence that many problems were not as severe as its politicians had made out.

ليه الباقي غلط العربات لحمل الرواتب وتغير الحكومة في 1923 أحداث مذكورة كحقائق.

27 **B They believe that people who had savings suffered most.**

السبب الشائع أن الفقراء عانوا أكثر، لكن بعض المؤرخين يرون أن أكبر المتضررين هم الطبقة الوسطى أصحاب المدخرات.

While you might think that the poor suffered most, some historians argue that the greatest casualties were middle-class Germans-those with savings.

الوقود الأحفوري
Fossil Fuels

ذكرها المختبرون 23 مرة

3 سؤال

Fossil fuels

(1) Fossil fuels include coal, oil and natural gas, formed from the remains of plants and animals which lived millions of years ago and obtained energy originally from the Sun. At present they are our main energy source. Predictions vary as to how long they will last since this depends on what reserves are recoverable and on the future demands of a world population expected to increase from about 7,000 million in 2011 to at least 7,600 million by the year 2050. Some estimates say oil and gas will run low early in the present century but coal should last for 200 years or so.

(2) Burning fossil fuels in power stations and in cars pollutes the atmosphere with harmful gases such as carbon dioxide and sulfur dioxide. Carbon dioxide emission aggravates the greenhouse effect and increases global warming. It is not immediately feasible to prevent large amounts of carbon dioxide entering the atmosphere, but less is produced by burning natural gas than by burning oil or coal; burning coal produces most carbon dioxide for each unit of energy produced.

(3) When coal and oil are burnt, they also produce sulfur dioxide which causes acid rain. The sulfur dioxide can be extracted from the waste gases so it does not enter the atmosphere or the sulfur can be removed from the fuel before combustion, but these are both costly and risky processes which increase the price of electricity produced using these measures.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

29 What is the main topic of the passage?

الفكرة الرئيسية

A The fossil fuels we rely on are destroying the planet.
B The negative effects of fossil fuels can easily be fixed.
C Burning coal produces more carbon dioxide than burning oil.
D Coal and oil will continue to be more important than natural gas.

30 What important ideas does the writer mention about sulfur dioxide in Paragraph (3)?

تفاصيل

A It is produced by burning natural gas.
B It is produced when cars pollute the atmosphere.
C It is dangerous and expensive to remove from fuel.
D It can aggravate the greenhouse effect and increase global warming.

ستيب STEP: تجميعات متكررة

ملف مجاني من تطبيق ستيب — Google Play و App Store

استنتاج

31 **Why does the writer mention the example of the increasing world population in the future?**

A to show why our main energy sources will last forever
B to show that electricity will become more expensive for people
C to show that oil and gas will be more important in the future
D to show how it will affect the amount of fossil fuels we use

10 الإجابات مع الشرح

29 **A The fossil fuels we rely on are destroying the planet.**

السبب أقرب خيار للفكرة العامة: الوقود الأحفوري هو مصدر طاقتنا الرئيسي (نعتمد عليه)، لكنه يلوث الجو ويزيد الاحتباس الحراري ويسبب المطر الحمضي، أي أنه يضر الكوكب.

> *At present they are our main energy source ... pollutes the atmosphere with harmful gases*

ليه الباقي غلط B عكس القطعة (المعالجة مكلفة وخطرة)، و C تفصيلة صغيرة، و D غير مذكور.

30 **C It is dangerous and expensive to remove from fuel.**

السبب الفقرة 3: إزالة الكبريت من الوقود عملية مكلفة وخطرة.

> *the sulfur can be removed from the fuel before combustion, but these are both costly and risky processes*

31 **D to show how it will affect the amount of fossil fuels we use**

السبب الكاتب يذكر زيادة سكان العالم لأن مدة بقاء الوقود تعتمد على الطلب في المستقبل.

> *this depends on what reserves are recoverable and on the future demands of a world population expected to increase*

11 الدوبامين Dopamine

ذكرها المختبرون 22 مرة

3 سؤال

(1) What do drug addiction and Parkinson's disease have in common? Improper levels of dopamine. This chemical acts as a messenger between brain cells. Dopamine is important for many of our daily behaviors. It plays a role in how we move, for instance, as well as what we eat, how we learn and even whether we become addicted to drugs.

(2) Chemical messengers in the brain are called neurotransmitters. They shuttle across the spaces between cells. These messengers then bind to docking-station molecules called receptors. Those receptors relay the signal carried by the neurotransmitter from one cell to its neighbor.

(3) Different neurotransmitters are made in different parts of the brain. Two main brain areas produce dopamine. One is called the substantia nigra. It's a tiny strip of tissue on either side of the base of your brain. It sits in a region known as the midbrain. Close by is the ventral tegmental area. It, too, makes dopamine.

(4) The substantia nigra is very important for movement. The term means "black substance" in Latin. And sure enough, this area of your brain is actually dark grey or black! The reason: Cells that produce dopamine also make another chemical that stains the area a dark color.

(5) These two brain areas are very thin and tiny. Together they are smaller than a postage stamp. But the dopamine they produce relays signals that travel throughout the brain. Dopamine from the substantia nigra helps us begin movements and speech.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

32 What is the main topic of the passage?

الفكرة الرئيسية

A Neurotransmitters and movement
B Neurotransmitters and cells
C Dopamine and the brain
D Dopamine and health

33 What is one important idea related to "neurotransmitters" that the writer mentions in paragraphs (1) and (2)?

تفاصيل

A They can make people ill.
B They control levels of dopamine.
C They take information from cell to cell.
D They have an effect on people's feelings.

محمد علي كلاي
Muhammad Ali

ذكرها المختبرون 22 مرة

4 سؤال

(1) Muhammad Ali is a famous heavyweight boxer. He was born in Louisville, Kentucky, in the USA in 1942. His birth name was Cassius Marcellus Clay. When he was young, he was an amateur boxing champion. In 1960, when he was still an amateur, he won the light heavyweight gold medal at the Olympic games in Rome.

(2) After that, Ali became a professional heavyweight boxer. He was 1.88 meters tall and his fighting weight was about 95 kilograms. He had a very successful professional boxing career. In fact, he won the world heavyweight championship three times. The first time was when he beat the former champion, Sonny Liston, in 1964. In the same year, he became a Muslim and assumed the name Muhammad Ali.

(3) In 1967 he refused to be drafted for the Vietnam War. Although a jury in a trial found him guilty, later the Supreme Court said that he had had the right to refuse.

(4) Ten years later, in 1974, he became world champion again when he beat George Foreman in Zaire. He became champion for the third time in 1978 after beating Leon Spinks. Ali fought his last professional fight in 1981 against Trevor Berbick and then retired from boxing.

(5) Heavyweight boxers are usually very strong but not fast, but Ali was very strong and very fast. He said his style was "to float like a butterfly and sting like a bee." Ali liked to talk a lot and people called him the Louisville Lip.

توقعات التجارة العالمية
The World Economic Outlook for Trade

ذكرها المختبرون 21 مرة

3 سؤال

(1) Although the global economy continued to grow robustly until 2007, economic performance was not equal: growth in the advanced economies slowed and then stopped in 2009, whereas emerging and developing economies continued to grow. Looking ahead, the International Monetary Fund (IMF), an international bank with 186 member nations, expected growth to continue until 2020 in both advanced and emerging developing economies.

(2) Although the U.S. economy had been growing steadily since 2000 and recorded the longest peacetime expansion in the nation's history, the worldwide recession which began in December 2007 slowed the rate of growth. The IMF estimated that the U.S. economy grew by less than half of 1 percent in 2008 and, because of subprime mortgage lending and other global financial problems, declined 2.5 percent in 2009. International experts recorded global economic growth of 3.9 percent in 2010 and 4.3 percent in 2011, despite the high oil prices.

(3) Canada and Western Europe: America's leading export partner, Canada, showed a growth rate of 2.6 percent in 2010 and 3.6 percent in 2011. The euro area which declined by 3.9 percent in 2009, grew by 1.0 percent in 2010, and by 1.6 percent in 2011. The United Kingdom and smaller European countries such as Austria, the Netherlands, Sweden, and Switzerland, experienced a recession.

(4) Mexico and Latin America: America's second largest export customer, Mexico, suffered its sharpest recession ever in 1995, and experienced another major setback in 2009. However, its growth rate in 2010 and 2011 was 4.0 percent and4.7 percent. respectively. Brazil escaped the recent global economic crisis with only minor setbacks: its growth in 2008 was more than 5 percent, and in 2009 it declined only 0.4 percent. In general, the Latin American and the Caribbean economies are recovering at a robust pace.

(5) Japan: Japan's economy is regaining momentum. Stronger consumer demand and business investment make Japan less reliant on exports for growth. The IMF puts the growth for Japan at 1.7 percent in 2010 and 2.2 percent in 2011.

(6) Other Asian Countries: The economic growth in Asia remained strong in 2008 and2009 despite the global recession. Growth was led by China, where its economy expanded by 8.7 percent in 2009, and by at 10 percent and 9.7 percent in 2010 and 2011. respectively. Growth in India slowed modestly to 5.6 percent in 2009. Growth in Indonesia, Malaysia, the Philippines, Thailand, and Vietnam was as expected at 4.7 percent and 5.3 percent in 2010 and2011, respectively. In short, the key emerging economies in Asia are leading the global recovery. China's emergence as a global economic power has been among the most dramatic economic developments of recent decades. From 1980 to 2004, China's economy averaged a real GDP growth rate of 9.5 percent and became the world's sixth-largest economy. China's total share in world trade expanded from 1 percent in 1980 to almost 6 percent in 2003. By2004, China had become the third largest trading nation in dollar terms, behind the United States and Germany and just ahead of Japan.

ملف مجاني من تطبيق ستيب — Google Play و App Store

(7) Emerging Europe: The year 2007 marked the sixth consecutive year during which emerging Europe grew much faster than Western Europe, but growth in many countries was uneven. The global economic crisis that plagued this region finally came to an end in 2009, and most countries in the region saw positive growth in2010 and 2011.

(8) Commonwealth of Independent States. The growth in this region turned out to be the predicted 3.8 percent in 2010 and 4.0 percent in 2011. Strong growth is expected to continue in Azerbaijan and Armenia. whereas growth is projected to remain stable in Moldova, Tajikistan, and Uzbekistan. After World War II, trade between the United States and the communist nations of Central and Eastern Europe was minimal. The United States maintained high tariff barriers on imports from most of these countries and also restricted their exports. However, since the disintegration of the Soviet Union and the collapse of communism, trade between the United States and Central and Eastern Europe has expanded substantially. The countries that made the transition from communist to market economies quickly have recorded positive growth for several years. Among the nations that have enjoyed several years of positive economic growth are the member countries of the Central European Free Trade Association: Hungary, the Czech Republic, Poland, Slovenia and Slovakia.

14 التقنية الحيوية Biotechnology

ذكرها المختبرون 21 مرة

4 سؤال

In the past couple of decades, the field of biotechnology has exploded. Biotechnology companies make products including vaccinations, medicines, and industrial bacteria that can be used to treat waste or clean up toxic spills. Biotechnology is closely related to the fields of genetics and genetic engineering, which have also made dramatic advances in recent years. Genetics is the study of genes and heredity, while genetic engineering is the changing of genetic material to produce specific results. Beginning in the 1950s, genetic researchers led by Rosalind Franklin, J.D. Waston and F.H.C. Crick, examined the chemical code carried by all living things. Their research established the central role of DNA in the chromosomes that determine human heredity. Their work revealed the "double helix" spiral-shaped DNA that carries hereditary traits from parents to children.

Ongoing genetic research has produced new drug therapies to fight human diseases. Research has also created new strains of fruits and vegetables that are intended to fight disease or thrive in conditions where they usually don't grow. Genetic cloning, or the process of creating identical organisms from the cell of an organism, has many practical applications in raising animals and in biological research.

Biotechnology and genetic engineering have brought benefits, but also debate. Some people understandably, believe that genetically modified foods are unnatural and potentially dangerous. The possibility of cloning genetically identical mammals has also raised questions about the role of science in creating and changing life.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

42 What does paragraph (4) say about biotechnology and genetic engineering?

تفاصيل

A They are dangerous for mammals.
B They can fight diseases.
C They have brought benefits and debate.
D They are useful for the sciences.

43 What can be used to fight human disease?

تفاصيل

A Fruit created from genetic research.
B DNA that carries hereditary traits.
C Biological research on animals.
D Genetic cloning of animals.

ملف مجاني من تطبيق ستيب — Google Play و App Store

استنتاج

44 **Why does the writer use the word "also" in paragraph (3)?**

A To give an example of drug therapies.
B To show that genetic engineering is different from biotechnology.
C To explain the dangers of genetically modified foods.
D To give more information about products made from genetic research.

استنتاج

45 **What does the writer think about the dangers of genetically modified foods?**

A He thinks it is safe.
B He is NOT sure if it has a negative effect.
C He understands why people think it is dangerous.
D He believes more research should be done.

14 الإجابات مع الشرح

42 **C They have brought benefits and debate.**

السبب: السؤال يعدّ فقرات الأصل (4 فقرات)، والمقصود هنا الفقرة الأخيرة؛ وهي تبدأ بأن التقنية الحيوية والهندسة الوراثية جلبت فوائد وجدلًا.

Biotechnology and genetic engineering have brought benefits, but also debate.

43 **A Fruit created from genetic research.**

السبب: البحث الجيني أنتج سلالات جديدة من الفواكه والخضار هدفها مقاومة الأمراض.

Research has also created new strains of fruits and vegetables that are intended to fight disease

44 **D To give more information about products made from genetic research.**

السبب: المقصود الفقرة التي تبدأ بـ Ongoing genetic research (الثالثة في الأصل). also تضيف معلومة جديدة: بعد العلاجات الدوائية، البحث أنتج «أيضًا» فواكه وخضارًا جديدة.

Ongoing genetic research has produced new drug therapies ... Research has also created new strains of fruits and vegetables

45 **C He understands why people think it is dangerous.**

السبب: كلمة understandably = «وهذا مفهوم»: الكاتب يتفهم لماذا يرى بعض الناس أن الأغذية المعدلة خطرة.

Some people understandably, believe that genetically modified foods are unnatural and potentially dangerous.

15 الباندا العملاقة
Giant Panda

ذكرها المختبرون 20 مرة
2 سؤال

(1) An American-born giant panda will soon be travelling to China. The Chinese government has an agreement with foreign zoos to lend giant pandas out only for scientific study. After a few years, they, and any cubs they may produce, must all be returned to China. Mei Lan, a three-year-old female, is being prepared for her trip to China, where her parents were born. A special FedEx flight from the U.S. is being arranged for her.

(2) Chinese Zookeepers are getting ready for her arrival by planning a special diet, and even language lessons for her. They are advertising for a tutor to teach Mei Lan Chinese. The caretakers at her new home, the Chengdu Panda Research Center in Sichuan, want to help her adapt quickly and feel comfortable in her new environment. Mei Lan has lived at a zoo in the city of Atlanta, Georgia, since her birth, and she is unfamiliar with Chinese. The teacher must have a bachelor's degree or higher and be fluent in both English and Chinese.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

تفاصيل

46 **According to Paragraph (2), why do the Chinese zookeepers want Mei Lan to learn Chinese?**

A so that she can speak with her caretakers
B so that she will feel at home in China
C so that she can forget her English
D so that she will like her new diet

تفاصيل

47 **According to Paragraph (2), Where has Mei Lan been living?**

A in the Chengdu Panda Research Center
B in an American research center
C in Atlanta, Georgia
D in Sichuan, China

15 الإجابات مع الشرح

46 **B so that she will feel at home in China**

السبب الهدف أن تتأقلم بسرعة وتشعر بالراحة في بيئتها الجديدة في الصين.

want to help her adapt quickly and feel comfortable in her new environment

47 **C** in Atlanta, Georgia

السبب عاشت في حديقة حيوان في مدينة أتلانتا بولاية جورجيا منذ ولادتها.

> *Mei Lan has lived at a zoo in the city of Atlanta, Georgia, since her birth*

ليه الباقي غلط مركز Chengdu في Sichuan هو بيتها الجديد الذي ستنتقل إليه.

16 حماية البيئات الطبيعية
Preserving Habitats and Ecosystems

ذكرها المختبرون 20 مرة
2 سؤال

(1) The main thrust of global conservation efforts today is to protect not just individual species but entire ecosystems. The goal is to preserve the natural interactions of many species. To that end, governments and conservation groups work to set aside land as parks and reserves. The United States has national parks, forests, and other protected areas. Marine sanctuaries are being created to protect coral reefs and marine mammals.

(2) The challenge is protecting areas that are large enough and that contain the right resources to protect biodiversity. To make sure that conservation efforts are concentrated in the most important places, conservation biologists have identified ecological "hotspots". An ecological hotspot is a place where significant numbers of species and habitats are in immediate danger of extinction. By identifying these areas, ecologists hope that scientists and governments can better target their efforts to save as many species as possible.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

معنى كلمة
48 The word "thrust" in paragraph (1) is closest in meaning to _____

A intention B judgment C guarantee D circumstance

معنى كلمة
49 The word "concentrated" in paragraph (2) is closest in meaning to _____

A balanced B identified C appreciated D emphasized

16 الإجابات مع الشرح

48 A intention

السبب: main thrust = الهدف والتوجه الأساسي، والجملة التالية تؤكد ذلك بكلمة The goal.

The main thrust of global conservation efforts today is to protect not just individual species but entire ecosystems. The goal is

49 D emphasized

السبب: concentrated هنا = تتركز الجهود وتُعطى الأولوية للأماكن الأهم، وأقرب خيار emphasized.

conservation efforts are concentrated in the most important places

17

النمو الحركي عند الأطفال
Motor Development

ذكرها المختبرون 19 مرة

4 سؤال

(1) As an infant's muscles and nervous system mature, more complicated skills emerge. With minor exceptions, the sequence of physical (motor) development is universal. Babies roll over before they sit unsupported, and they creep on all fours before they walk. These behaviors reflect not imitation but a maturing nervous system; blind children too, crawl and walk.

(2) But there are individual differences in the timing of this sequence. In the United States, for example, 25 percent of all babies walk by age 11 months, 50 percent within a week after their first birthday, and 90 percent by age 15 months.

(3) There are also cultural differences in timing. Although such differences could be genetic, experiments reveal that experience does predict motor behavior. Consider Ugandan babies, for example, who usually walk by 10 months. Unlike babies from other cultures who spend much of the day lying in a crib, Ugandan babies experience more intimate and rhythmic physical contact while being carried on the back. Two-week-old babies wave their arms more if they can see them, suggesting that they are learning to visually control their movements. Although 3-month-old infants still cannot efficiently reach and grab something, their seemingly spontaneous kicking movements become more purposeful and coordinated when they activate a mobile.

(4) But nature (genes) plays a major role, too. Identical twins typically begin sitting up and walking on nearly the same day. Biological maturation-including the rapid development of the cerebellum at the brain's rear-creates a readiness to learn walking within 2 or 3 month of age 1.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

50 تفاصيل

Why can Ugandan babies usually walk by 10 months?

A They imitate their mothers.
B They wave their arms more.
C Their muscles develop faster.
D Their mothers carry them more.

51 تفاصيل

What is the effect of infants being able to see their arms?

A They move them more.
B Their kicking improves.
C Their brains develop faster.
D They reach and grab sooner

18 المشكلات والحلول
Solutions and Problems

ذكرها المختبرون 19 مرة
3 سؤال

(1) Some people do not like the word “problem”; they say, “we don’t have problems, we have solutions.” The word “problem” is used in different ways. It can mean something that is causing us a difficulty. The word “problematical” suggests a situation where we cannot see an easy solution to something. However, not all problems are like this. In some cases, we may enjoy problems and solve them for fun: for example, when doing a puzzle or playing a video game.

(2) Most people have some sorts of problem in their lives and many of these may be solved with a little careful thought. The problem solving we are talking about here is based on reasons; it is often math, in the sense shape or number, but does not require a high level of formal math to solve. It is largely based upon the real world and is not abstract like much of mathematics.

(3) Many people, from builders to architects, from soccer players to lawyers, use this type of problem solving in their everyday lives. On the face of it, critical thinking and problem solving might appear as quite separate disciplines. Most critical thinking questions are primarily word based, but many problem-solving questions contain number-based information. However, the skills used, especially in the application of reason, are quite similar. Scientists, politicians and lawyers will frequently use both word based and numerical data.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

54 What is one difference between critical thinking and problem solving? — تفاصيل

- A Problem solving is more enjoyable than critical thinking.
- B Critical thinking requires knowledge of formal math.
- C One uses words while the other uses numbers.
- D One is based on real world knowledge

55 Which of the following is the writer’s opinion? — استنتاج

- A Many careers involve problem solving
- B Many personal problems have a solution
- C The word “problem” has different meanings
- D Some problems require knowledge of mathematics

ملف مجاني من تطبيق ستيب — Google Play و App Store

استنتاج

56 **How is the writer's view of problems different from other people's views?**

A She thinks solving problems requires knowledge of math.

B She thinks most problems are too complex to solve.

C She thinks the word problem is difficult to define.

D She thinks problems can be entertaining.

18 الإجابات مع الشرح

54 **C One uses words while the other uses numbers.**

السبب الفرق: أسئلة التفكير النقدي غالبًا بالكلمات، وأسئلة حل المشكلات فيها أرقام.

Most critical thinking questions are primarily word based, but many problem-solving questions contain number-based information.

55 **B Many personal problems have a solution**

السبب الكاتب يرى أن كثيرًا من مشاكلنا يمكن حلها ببعض التفكير؛ كلمة may تدل على رأي وتقدير.

many of these may be solved with a little careful thought

ليه الباقي غلط A و C و D معلومات يعرضها الكاتب كحقائق.

56 **D She thinks problems can be entertaining.**

السبب بعض الناس يرون المشكلة صعوبة فقط، أما الكاتب فيقول إننا أحيانًا نستمتع بالمشكلات ونحلها للتسلية.

In some cases, we may enjoy problems and solve them for fun

19 الوجبات السريعة
Fast Food

(1) Fast food is the name given to food that can be prepared and served quickly, often served at basic restaurants or in packaged form for convenient takeaway. It is typically inexpensive to buy but unhealthy to eat. The fast-food industry is a multibillion-dollar industry. In the year 2020, the fast-food industry was worth 570 billion dollars daily. The industry is expected to have an annual growth of 2.5% for the next several years.

(2) Popular forms of fast food include burgers, fries, pizza, fish and chips, kebabs, and fried chicken. Well-known fast-food franchises and restaurants include McDonalds, Kentucky Fried Chicken (KFC), Pizza Hut, Taco Bell, and Burger King. As well as at restaurants, fast food is usually sold at grocery stores and gas stations. Examples of this include hotdogs, meat pies, and doughnuts.

(3) While hamburgers, fries and pizza are seen as traditional fast foods, countries throughout the world sell all types of fast food that may not be so well known. Some examples of these include kebabs, Chinese takeaways (fried noodles, rice and meat dishes), sushi and bento type foods in Japan and fish and chips in the UK, New Zealand and Australia.

(4) Because now we understand that a healthy diet is important for good health, more efforts have been made to improve fast food menus by lowering fat levels or at least offering healthier choices. While these health issues are creating more attention, fast food is still linked to weight gain problems, diabetes, and increased healthcare costs.

20 الأوروبيون في أستراليا
Europeans in Australia

ذكرها المختبرون 14 مرة
2 سؤال

(1) The Dutch in the 1600s were the first Europeans to reach Australia. In 1770, Captain James Cook claimed Australia for Britain. For a time, however, Australia remained too distant to attract European settlers.

The First Settlers

(2) Like most regions claimed by the imperialist powers, Australia had long been Inhabited by other people. The first settlers had reached Australia perhaps 40,000 years earlier, probably from Southeast Asia, and spread across the continent. These Indigenous people were called Aborigines, a word used by Europeans to denote the earliest people to live in a place. Today many Australian Aborigines call themselves Kooris. Isolated from the larger world, the Aborigines lived in a small hunting and food-gathering bands, much as their ancestors had.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

21 التونة والسلمون
Tuna and Salmon

ذكرها المختبرون 14 مرة

3 سؤال

(1) Some estimates report the world's oceans are home to 20,000 species of fish. Ocean fish come in all shapes, sizes, and colors and live in drastically different depths and temperatures. Two of the most commonly known fish are tuna and salmon.

(2) Salmon are fish that are known for making long, difficult journeys in order to breed. Salmon belongs to the scientific family Salmonidae, which also includes trout. There is one species, or type, of Atlantic salmon. There are six species of Pacific salmon: coho, chum, king, pink, sockeye, and cherry.

(3) Tuna are large fish that live in most parts of the world's oceans. They belong to the same family of fish as mackerel. Tuna is one of the most popular foods that comes from the sea. Most of the tuna that fishers catch is canned. There are seven different species, or types, of tuna: bluefin, albacore, yellowfin, bigeye, blackfin, longtail, and southern bluefin. The skipjack tuna is related to these species, but it belongs to a separate group of fish.

(4) The Atlantic salmon lives mainly in the North Atlantic Ocean. It breeds in the rivers of North America and Europe. Pacific salmon are found in the waters of the North Pacific. They breed in rivers near both the North American and Asian coasts.

(5) Salmon come in a range of sizes. The Atlantic salmon weighs about 12 pounds (5.5 kilograms). The pink salmon usually weighs 3 to 6 pounds (1.4 to 2.7 kilograms). The king salmon may weigh 25 pounds (11 kilograms) or more. While in the ocean, salmon have a silver color and spots on their back and fins. During the breeding season, they undergo changes in color that vary by species.

(6) A tuna has a long, rounded body. It is usually dark on top and silvery underneath. Some species have spots or stripes. Unlike other types of fish, a tuna can keep its body warmer than the temperature of the surrounding water. Many species of tuna are about 35 inches (90 centimeters) long. The bluefin tuna is the largest species. It can grow as long as 14 feet (4 meters) and weigh up to 1,800 pounds (800 kilograms).

(7) After being born in fresh water, salmon travel to the ocean. They live there for one to three years. Then they travel back to where they hatched in order to breed. For some salmon, this can mean a trip of more than 2,000 miles (3,200 kilometers). Salmon may leap over waterfalls and cut through churning rapids to reach their home waters again. Once in fresh water, salmon stop eating and live off their body fat. The males fight for a mate. After a male and a female are paired, the female digs a pit and lays thousands of eggs. Most Pacific salmon die shortly after mating. Many Atlantic salmon, however, return to the sea and may breed again.

(8) Tuna travel in large groups called schools. Some species travel long distances. Tuna feed on other fish, including herring, menhaden, and mackerel. Some species also eat small, spineless animals such as squid. Some types of tuna return to the waters where they hatched to spawn, or produce eggs.

Profitability and Success

ذكرها المختبرون 14 مرة
5 سؤال

(1) some management theorists argued that a conscientious manager in a for-profit setting acts ethically by emphasizing solely the maximization of earnings. Most commentators, however, contend that ethical business leadership is grounded in doing right by all stakeholders directly affected by a firm's operations, including, but not limited to, stockholders, or those who own shares of the company's stock. That is, business leaders do right when they give thought to what is best for all who have a stake in their companies. Not only that, firms actually reap greater material success when they take such an approach, especially over the long run.

(2) Nobel Prize – winning economist Milton Friedman stated in a now-famous New York Times Magazine article in 1970 that the only "social responsibility of a business is to increase its profits." This concept took hold in business and even in business school education. However, although it is certainly permissible and even desirable for a company to pursue profitability as a goal, managers must also have an understanding of the context within which their business operates and of how the wealth they create can add positive value to the world. The context within which they act is society, which permits and facilitates a firm's existence.

(3) Thus, a company enters a social contract with society as whole, an implicit agreement among all members to cooperate for social benefits. Even as a company pursues the maximizing of stockholder profit, it must also acknowledge that all of society will be affected to some extent by its operations. In return for society's permission to incorporate and engage in business, a company owes a reciprocal obligation to do what is best for as many of society's members as possible, regardless of whether they are stockholders. Therefore, when applied specifically to a business, the social contract implies that a company gives back to the society that permits it to exist, benefiting the community at the same time it enriches itself.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

64 استنتاج

Which of the following is an opinion?

A Milton Friedman won the Nobel Prize.
B One aim of a company is to make a profit for its stockholders.
C Business education focused on the profit only approached for a few years.
D Maximizing profit represents the only social responsibility of a company.

ملف مجاني من تطبيق ستيب — Google Play و App Store

65 How is the modern view of good management different from the traditional view? استنتاج

A It focuses only on making profits.
B It considers the benefit of all stakeholders.
C It carefully assigns roles within the company.
D It develops specific strategies for improvement.

66 How is the writer's view of profitability different from Milton Friedman's view? استنتاج

A He believes it should be the only goal of business.
B He believes it should consider the context of business
C He believes it should be achieved through reducing costs.
D He believes it should be built on careful market research.

67 What can we understand from Paragraph (2) about Milton Friedman? استنتاج

A He believed in the social responsibility of profit companies.
B He supported establishing more free markets.
C He was an advocate of the profit only approach.
D He called for less government interference in business.

68 What can we understand from Paragraph (2) about the context within which a business operates? استنتاج

A It is simple.
B It is irrelevant.
C It is important.
D It is complicated

22 الإجابات مع الشرح

64 **D Maximizing profit represents the only social responsibility of a company.**

السبب أن الربح هو «المسؤولية الاجتماعية الوحيدة» للشركة قول لـ Milton Friedman يعارضه أغلب المعلقين؛ إذن رأي.

the only "social responsibility of a business is to increase its profits."

ليه الباقي غلط A حقيقة مذكورة، و B أمر يقرّه الكاتب نفسه (السعي للربح مقبول ومرغوب)، و C غير مذكور في القطعة.

65 **B It considers the benefit of all stakeholders.**

السبب الرأي القديم: الربح فقط. أغلب المعلقين اليوم: القيادة الأخلاقية تهتم بكل أصحاب المصلحة.

ethical business leadership is grounded in doing right by all stakeholders directly affected by a firm's operations

ستيب STEP تجميعات متكررة

66 **B** He believes it should consider the context of business

السبب Friedman قال الربح فقط، أما الكاتب فيقول إن على المديرين أن يفهموا السياق (المجتمع) الذي تعمل فيه الشركة.

> *managers must also have an understanding of the context within which their business operates*

67 **C** He was an advocate of the profit only approach.

السبب قوله إن المسؤولية الوحيدة للشركة زيادة أرباحها يعني أنه من أنصار «الربح فقط».

> *the only "social responsibility of a business is to increase its profits."*

68 **C** It is important.

السبب الكاتب يقول إن المديرين «يجب» أن يفهموا السياق، وإن المجتمع هو الذي يسمح بوجود الشركة؛ إذن السياق مهم.

> *The context within which they act is society, which permits and facilitates a firm's existence.*

Energy Producers and Consumers

ذكرها المختبرون 14 مرة
3 سؤال

(1) At the core of every organism's interaction with the environment is its need for energy to power's life processes. Ants use energy to carry objects many times their size. Birds use energy to migrate thousands of miles. You need energy to get out of bed in the morning! Where does energy in living systems come from? How is it transferred from one organism to another?

(2) Living systems operate by expending energy. Organisms need energy for growth, reproduction, and their own metabolic processes. In short, if there is no energy, there are no life functions. Yet, no organism can create energy – organisms can only use energy from other sources. You probably know that you get your energy from the plants and animals you eat. But where does the energy in this food come from? For most life on earth, sunlight is the ultimate energy source. Over the last few decades, however, through research, experts have discovered that there are other energy sources for life. For some organisms, chemical energy stored in inorganic chemical compounds serves as the ultimate energy source for life processes.

(3) Only algae, certain bacteria and plants can capture energy from sunlight or chemicals and convert it into forms that living cells can use. These organisms are called autotrophs. Autotrophs use solar or chemical energy to produce food by assembling inorganic compounds into complex organic molecules. But autotrophs do more than feed themselves. Autotrophs store energy in forms that make it available to other organisms that eat them. That's why autotrophs are also called primary producers.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

69 تفاصيل
Why are autotrophs known as primary producers?

A Because autotroph means primary producers in Latin.
B They are able to survive off their own sources of energy.
C They both use the sun and chemical compounds for energy.
D Because their productions of energy benefits other organisms.

70 معنى كلمة
The word "transferred" in paragraph (1) is closest in meaning to _____

25 النباتات الجديدة
New Plants

ذكرها المختبرون 12 مرة
2 سؤال

(1) The discovery and introduction of new crop plants has frequently changed human history. Before they were discovered in the Americas, many important crops-including corn, peanuts, and potatoes – were unknown in Europe. The introduction of these plants changed European agriculture rapidly. We think of boiled potatoes for example, as a traditional staple of German and Irish cooking, but 400 years ago, potatoes were new items in the diets of Europeans.

(2) The efficiency of agriculture has been improved through the selective breeding of crop plants and improvements in farming techniques. The corn grown by Native Americans, for example, was developed more than 8000 years ago from teosinte, a wild grass found in Mexico. Further selective breeding has produced modern day corn. The change caused by selective breeding can be very dramatic.

(3) In more recent times, other familiar crops have been the product of selective breeding. Sugar beets, the source of most refined sugar from the United States, were produced from the ordinary garden beet using selective breeding. Plants as different as cabbage, broccoli and brussels sprouts have been developed from a single species of wild mustard.

26 الجسيمات الدقيقة وعواصف الأمازون
Ultrafine Particles and Amazon Storms

(1) Ultrafine aerosol particles found in polluted urban air can contribute to more intense storms in the Amazon rainforest, with potential knock on effects for weather and climate patterns in the region and beyond, researchers have warned.

(2) Particles smaller than 50 nanometers in diameter have a substantial influence on cloud formation in the Amazon. In turn, the rainforest has a strong influence on climate regulation worldwide, and aerosol effects observed in this region could also trigger climate shifts globally, according to a study published in Science.

(3) Until this study, ultrafine particles were thought to be too small to affect the formation of clouds. This has now been overturned, at least in the specific circumstances of the Amazon. "These tiny particles were thought to be too small to aid droplet formation", says meteorologist Luiz Augusto Machado, from the Brazilian Institute for Space Research's Center for Weather Forecasting and Climate Studies, and one of the study's authors. "Now we verified that their presence is one reason why some storms become so strong and produce so much rain in the Amazon region".

(4) Pérola de Castro Vasconcellos, a chemist at the University of Sao Paulo's Laboratory of Atmospheric Chemistry Studies, added: "this study changes the way clouds are to be represented in models used for weather forecasting, as well as the way researchers understand the workings of tropical rain"

(5) The research team analyzed the influence of ultrafine particles on cloud cycles in the rainforest during the 2014 rainy season, when there were no forest fires and the only source of pollution was Manaus, the largest city in the Amazon

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

75 What is the main topic of the passage?

الفكرة الرئيسية

A effects of aerosol use on weather in the Amazon
B pollution and aerosol use in the Amazon
C weather forecasting in the the Amazon
D storms in the Amazon

ملف مجاني من تطبيق ستيب — Google Play و App Store

تفاصيل

76 **What is one important idea related to ultrafine particles that the writer mentions in paragraph (3)?**

A There are many of them in the air in the Amazon
B They help produce bigger storms in the Amazon.
C They are too small to have an effect on the weather
D The Brazilian Institute for Space Research is studying them

تفاصيل

77 **What is Manaus an example of?**

A a large university city
B a large Amazon rainforest
C an area with high pollution
D an ultrafine aerosol particle

26 الإجابات مع الشرح

75 **A effects of aerosol use on weather in the Amazon**

السبب القطعة كلها عن تأثير الجسيمات الدقيقة (aerosol particles) على السحب والعواصف في الأمازون.

Ultrafine aerosol particles found in polluted urban air can contribute to more intense storms in the Amazon rainforest

76 **B They help produce bigger storms in the Amazon.**

السبب الفقرة 3: وجود هذه الجسيمات من أسباب قوة بعض العواصف في الأمازون.

their presence is one reason why some storms become so strong and produce so much rain in the Amazon region

ليه الباقي غلط C كان الاعتقاد القديم الذي أثبتت الدراسة خطأه.

77 **C an area with high pollution**

السبب Manaus هي المدينة التي كانت المصدر الوحيد للتلوث وقت الدراسة.

the only source of pollution was Manaus, the largest city in the Amazon

4 سؤال

27 زيادة متوسط العمر
Increase in Life Expectancy

Increase in life expectancy

(1) The life expectancy is the average age to which a newborn baby can be expected to live. In Europe between 1830 and 1900 the life expectancy was 40-50 years. Between 1900 and 1950 it rose to 65 and now it is 73-74 years. In central Africa, life expectancy was rising to 58 years until the AIDS epidemic caused it to fall back to about 45 years.

(2) These figures are averages. They do not mean, for example, that everyone in the developing world will live to the age of 58. In the developing world, 40% of the deaths are of children younger than 5 years and only 25-30% are deaths of people over 60. In Europe, only 5-20% of deaths are those of children below the age of 5, but 70-80% are of people over 60.

(3) An increase in the number of people over the age of 60 does not change the rate of population growth much, because these people are past the age when they can have children. On the other hand, if the death rate among children falls and the extra children survive to have children of their own, then the population will continue to grow. This is the chief reason for the rapid population growth in the developing world since 1950.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

78 تفاصيل

What did AIDS lead to in central Africa?

A A drop in the population growth rate.
B A drop in the average expected life time.
C A drop in the number of babies born alive
D A drop in the health of children under the age of 5.

79 تفاصيل

What can cause growth in population rate?

A an increase in numbers of 74 year-old people
B an increase in numbers of women over 45 who have children
C an increase in numbers of people living until the age of 60
D an increase in the number of young people living and having children

البراكين
Volcanoes

ذكرها المختبرون 11 مرة

3 سؤال

(1) A volcano is an opening in Earth's crust. When a volcano erupts, hot gases and melted rock from deep within Earth find their way up to the surface. This material may flow slowly out of a fissure, or crack, in the ground, or it may explode suddenly into the air Volcanic eruptions may be very destructive. But they also create new landforms. There are more than 1.500 potentially active volcanoes in the world today.

(2) During a volcanic eruption, hot melted rock called magma escapes from a vent, or opening in Earth's surface, or crust. Magma released from a volcano is known as lava. Fresh lava ranges from 1.300 to 2.200 F 700 to 1.200 C) in temperature. Earth's crust is made up of huge, rocky pieces called plates. The plates move slowly over the crust. Most volcanoes lie along the boundaries between these plates.

(3) Some of the most violent eruptions take place where the edge of one plate is forced beneath the edge of another. This forces magma to rise to the surface. Hot gases in the magma make these volcanoes very explosive. Most volcanoes of this type are found around the edges of the Pacific Ocean. This huge circle of volcanoes is known as the Ring of Fire.

(4) Volcanoes also form in places where two plates slowly pull apart. Molten rock rises between the plates as they move apart. It causes fissure eruptions, in which lava flows out over the ground. This type of volcano is common along the Mid-Atlantic Ridge, a mountain chain under the Atlantic Ocean. Volcanoes in the northern part of this ridge formed the island country of Iceland. A small number of volcanoes are not located along the edges of plates. They form at "hot spots" in Earth's crust. At a hot spot, molten rock rises from deep below the crust. The volcanoes of Hawaii are the best examples of hot-spot volcanoes.

(5) The word volcano comes from the name of Vulcan. The ancient romans god of fire and metalworking. The Roman believed that volcano eruptions resulted when Vulcan made thunderbolts and weapons for the gods. Other cultures explained volcanoes as ordinates of anger from a god goddess. pele was the name of the volcano goddess of the native Hawaiians. Volcanoes have a long history of distinction. In ad 79, the eruption of Mount volcanoes destroyed the Roman cities of Pompeii and Herculaneum.

(6) Two of the deadliest volcanic eruptions happened in 1815 and 1883 on islands in what is now Indonesia. In 1815, Mount Tambora released so much ash into the air that it blocked out large amount of sunlight. Temperatures around the world dropped for months afterward, making 1816 a "year without summer". in 1883 the volcano Krakatoa exploded and collapsed triggering a colossal sea wave known as a tsunami. tens of thousands of people were killed by these.

(7) On May 8, 1902, Mount Pelee erupted on the Caribbean Island of Martinique. Although very little lava flowed, an unstoppable black cloud of hot gases and ash engulfed the city of Saint-Pierre, killing almost all of its 30.000 people. The birth of a volcano was witnessed between 1943 and 1952, when a smoking hole in a Mexican farmer's cornfield erupted into a new mountain called Paricutin that eventually stood 1,400 feet (425 meters) above the level ground around it.

(8) Another notable event took place in 1963, when a new volcanic island called Surtsey rose up from the Atlantic Ocean near Iceland. Within a few years it built up to an area of 1 square mile (25 square kilometers), with a peak more than 560 feet (1 70 meters) above sea level.

(9) The 1980 eruption of Mount Saint Helens, in the U.S. state of Washington, was one of the biggest in North America. The 1991 eruption of Mount Pinatubo, in the Philippines, was the largest of the 1900s. These eruptions killed fewer people than earlier volcanoes, but they still destroyed much property. Another volcano in Iceland erupted in 2010 and caused major problems for travelers throughout the world. The volcano produced a huge ash cloud that spread to the east. It caused many airports in Europe to c lose because it was too dangerous for planes to fly through the ash.

تفاصيل

82 Which year was called "the year without a summer"?

A 1815 B 1816 C 1825 D 1883

تفاصيل

83 Which Island was formed by volcanoes?

A Hawaii B Ireland C Iceland D Indonesia

تفاصيل

84 What is lava?

A ash B gas C magma D dust

28 الإجابات مع الشرح

82 B 1816

السبب الثوران كان في 1815، والسنة التي بعدها 1816 سُميت «سنة بلا صيف».

making 1816 a “year without summer”

ليه الباقي غلط 1815 سنة الثوران نفسه وليست السنة بلا صيف.

83 C Iceland

السبب البراكين في الجزء الشمالي من الحيد الأطلسي كوّنت دولة آيسلندا الجزيرة.

Volcanoes in the northern part of this ridge formed the island country of Iceland.

ليه الباقي غلط Hawaii مذكورة فقط كمثال على براكين «النقاط الساخنة»، والقطعة لم تقل إن البراكين كوّنتها.

موجة الحر في أوروبا
Heat Wave in Europe

ذكرها المختبرون 11 مرة

3 سؤال

(1) Another deadly heat wave has arrived in Europe this week. Record temperatures went over 37.8 degrees Celsius (100 degrees Fahrenheit) in parts of France, Germany, Poland and Spain, with hotter days to come. The same thing happened in 2018 when record-breaking heat was responsible for 700 deaths in Sweden and more than 250 in Denmark, countries that have never needed air conditioning before this new era of extreme climate change events.

(2) Europe's five hottest summers in the past 500 years have all occurred in the last 15 years, not including this summer. All have been deadly. The 2003 heat wave was the worst, having led to the deaths of over 70,000 people; in 2010, 56,000 people died in Russia alone.

(3) These extreme heat events are all connected to a slower jet stream that locks weather systems into place. Studies have linked the slowdown in the jet stream-the band of high-altitude winds that sweep around the globe from west to east-to last summer's unprecedented droughts, heat waves, wildfires, and flooding events across the entire Northern Hemisphere. This is also likely to be behind India's weak monsoon rains and the widespread flooding in certain areas of the U.S. this year.

(4) The loss of sea ice in the Arctic is increasing temperatures in the northern regions of our planet, and that is disrupting the natural jet stream patterns. Jet stream winds are driven by the temperature difference between the icy air of the Arctic and hot air from the tropics. A rapidly warming Arctic-this past winter it saw its lowest ever ice cover-reduces that temperature difference and slows the jet stream.

(5) Like a slow-moving river, a slower jet stream forms deep curves and turns, which can slow down during the summer, sometimes for weeks. Weather patterns are also delayed with them, whether they are heat waves or expected rains.

(6) Temperatures in Europe are nowhere near as hot as India's current month-long heat wave, where temperatures on the Asian subcontinent reached 51°C (123°F). Most Europeans, particularly in the north, are unused to anything over 29°C (85°F). Air conditioning also remains rare in Europe. It is found in less than five percent of homes in France, for example, and less than two percent of German homes. As a result, temperatures reaching 40°C in June will test the abilities of Europeans to deal with the hotter years ahead.

(7) European cities are hotter than the surrounding suburban and rural landscape because of the urban heat island effect. Concrete and asphalt absorb heat during the day and release it at night, which keeps urban areas hotter. Without major cuts in carbon emissions, which are released into the air when we burn fossil fuels, scientists argue that the number of heat wave days in cities is likely to increase 10 times by the end of this century.

(8) European governments and citizens are debating what to do about the increasing heat. Some would argue that people should just buy air conditioners to keep their homes cool. However, air conditioning increases energy use, which will in turn increase carbon emissions across European

countries. Both governments and citizens are wary of increasing carbon emissions because it would lock them in a cycle that would increase the negative effects of climate change. Now these European countries face a dilemma. Although the majority of citizens in Europe want more government action to reduce carbon emissions, as the temperatures continue to increase, the demand for air conditioning units will also continue to rise.

(9) Europe learned valuable lessons from the 2003 heat wave, which killed more than 70,000 people across the continent. Governments have taken several actions to ensure that death tolls would be more limited during this heat wave. For example, Paris, which experienced many deaths in 2003, is much better prepared this time around. Government officials have emergency services in place and there has been a strong campaign to raise awareness of the dangers of the heat wave around the city. Some schools in France have also closed since most of them do not have air conditioners. The local governments have also set up cooling areas and temporary water fountains in busy city areas.

(10) Paris has relatively little green space and has been working for years on how to "green up" and introduce more plants in order to counter the heat held by stone and concrete. Paris officials also plan to keep 13 large parks open all night during the anticipated heat wave because the temperature there would be one or two degrees lower than in the rest of the city. There are also plans to keep public swimming pools open later to encourage people to swim at night in order to cool down from the heat. In Paris, older cars have also been banned from use in the city to reduce the city's air pollution, which increases during a heat wave.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

85 What two things are needed to have jet stream winds? تفاصيل

- **A** monsoon rains and icy Arctic air
- **B** hot air from the tropics and the summer
- **C** icy Arctic air and hot air from the tropics
- **D** monsoon rains and hot air from the tropics

86 What two things could increase heat waves in European cities? تفاصيل

- **A** wildfires and pollution
- **B** drought and low usage of air conditioning
- **C** widespread flooding and carbon emissions
- **D** the urban heat island effect and more usage of air conditioning

ملف مجاني من تطبيق ستيب — Google Play و App Store

تفاصيل

87 What are two ways Paris is fighting the heat wave?

- **A** banning older cars in the city and using more air conditioning
- **B** reducing carbon emissions and using plants to make more green space
- **C** keeping public swimming pools open later and reducing carbon emissions
- **D** using plants to make more green space and keeping public parks open all night

29 الإجابات مع الشرح

85 **C** icy Arctic air and hot air from the tropics

السبب رياح التيار النفاث تحركها فروق الحرارة بين هواء القطب البارد وهواء المناطق الاستوائية الحار.

> *Jet stream winds are driven by the temperature difference between the icy air of the Arctic and hot air from the tropics.*

86 **D** the urban heat island effect and more usage of air conditioning

السبب الفقرة 7: «الجزيرة الحرارية» تجعل المدن أحر، والفقرة 8: التكييف يزيد استهلاك الطاقة وانبعاثات الكربون فتزيد آثار تغير المناخ.

> *European cities are hotter than the surrounding suburban and rural landscape because of the urban heat island effect ... air conditioning increases energy use, which will in turn increase carbon emissions*

ليه الباقي غلط باقي الخيارات فيها شيء لم يُربط بحرارة المدن الأوروبية (الحرائق، الفيضانات، أو قلة التكييف).

87 **D** using plants to make more green space and keeping public parks open all night

السبب الفقرة 10: باريس تزرع نباتات لزيادة المساحات الخضراء، وتترك 13 حديقة كبيرة مفتوحة طوال الليل.

> *introduce more plants in order to counter the heat ... keep 13 large parks open all night*

ليه الباقي غلط في A منع السيارات القديمة مذكور فعلًا، لكن زيادة التكييف ليست من إجراءات باريس. وفي B و C «تقليل الانبعاثات» ليس من إجراءات باريس المذكورة (منع السيارات القديمة هدفه تقليل تلوث الهواء).

الفكر الاقتصادي غير الغربي
Non-Western Economic Thought

ذكرها المختبرون 11 مرة

4 سؤال

Non-Western Economic Thought

(1) Western historians of economic thought, like ourselves, have a tendency to focus on Western writers. Whether this is justified or not is a matter of opinion. J. A. Schumpeter, who wrote a comprehensive, widely respected history of economic thought in 1954, held that he could find no non-Western early economic writing with any analytic content and further that "no piece of reasoning on strictly economic topics has come down to us that can be called 'scientific' within our meaning of the term." Schumpeter also pointed to what he regarded as a curious gap in economic literature between the writings of the Greeks and Aquinas, a period of nearly one thousand years during which no economic writings of merit seemed to have been produced.

(2) Scholars since Schumpeter have questioned his conclusions and have been able to find some interesting early economic writings of merit. We will briefly examine newly translated works of a seventh century BCE Chinese writer, Guan Zhong (725-645 BC), for example, in order to give you a flavor of his contributions and, more broadly, to suggest that analysis of economic activity is likely to occur at various times and places. The majority of early Chinese writings on economics fit Schumpeter's characterization: they were essentially limited to considerations of public administration within ethical frameworks, rather than strictly "scientific" studies. Guan Zhong's book Guanzi, however, stands out as going far beyond the administrative mold. It includes a number of ideas that are central to economic thinking. Probably the most important of these is his "light/heavy" theory, an anticipation of supply/demand theory. Others include his anticipation of the quantity theory, his discussion of countercyclical fiscal policy, and his appreciation for the workings of the market.

(3) Guan Zhong argued that when a good was abundant it became light and its price would fall. When it was locked away it became heavy, and its price would rise. There would be movements of goods into and out of markets based on their lightness and heaviness, with a definite tendency toward one price equilibrium. Thus, the light/heavy theory is a statement of the law of supply and demand.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

88 معنى كلمة

What word other than "analytic content" does the writer use to talk about economic writing?

A curious
B justified
C scientific
D comprehensive

ملف مجاني من تطبيق ستيب — Google Play و App Store

استنتاج

89 **Which of the following does the writer say is a fact?**

A Schumpeter failed to find non-western scientific economic ideas.
B Guan Zhong produced a theory called supply and demand.
C The Greeks and Aquinas produced economic literature.
D Schumpeter wrote a history of economic literature

استنتاج

90 **What can we understand about economic thought from Paragraph (1)?**

A Schumpeter is the founder of modern economic thought and literature
B All economic thought comes from Western sources.
C The development of economic theories is to his early stages
D There were long spells when no economic literature was produced

استنتاج

91 **What can we understand about Zhong's ideas from Paragraph (3)?**

A Goods will always get more expensive.
B Prices rise and fall depending on the movement of goods.
C He named his economic theory: the Law of Supply and Demand.
D Goods that are 'locked away' are in high-demand and are expensive.

30 الإجابات مع الشرح

88 **C scientific**

السبب كلمة scientific تأتي بنفس معنى analytic content: في كلام Schumpeter في الفقرة 1، ثم يستخدمها الكاتب نفسه في الفقرة 2.

> *no piece of reasoning on strictly economic topics has come down to us that can be called 'scientific' ... rather than strictly "scientific" studies*

89 **D Schumpeter wrote a history of economic literature**

السبب أن Schumpeter كتب تاريخًا للفكر الاقتصادي في 1954 حقيقة يمكن التأكد منها.

> *J. A. Schumpeter, who wrote a comprehensive, widely respected history of economic thought in 1954*

ليه الباقي غلط A و C جزء من آراء Schumpeter (لا توجد كتابات غير غربية علمية، و«فجوة» بين الإغريق و Aquinas)، والباحثون بعده شككوا في استنتاجاته. و B خطأ: نظرية Guan Zhong اسمها light/heavy وهي فقط تسبق فكرة العرض والطلب.

90 **D There were long spells when no economic literature was produced**

السبب الفقرة 1 تذكر فترة قرابة ألف سنة بين الإغريق و Aquinas بلا كتابات اقتصادية ذات قيمة.

> *a period of nearly one thousand years during which no economic writings of merit seemed to have been produced*

91 **B** Prices rise and fall depending on the movement of goods.

السبب الفقرة 3: إذا كثرت السلعة نزل سعرها، وإذا حُبست ارتفع، والسلع تتحرك داخل الأسواق وخارجها حسب ذلك.

> *when a good was abundant it became light and its price would fall. When it was locked away it became heavy, and its price would rise*

ليه الباقي غلط C خطأ: هو سمّاها light/heavy. و D تضيف «الطلب العالي» وهو غير مذكور؛ السبب قلة المعروض.
