STEP Reading — The Most Repeated Passages, Part 3

30	86
قطعة (الجزء الثالث)	سؤال مع الشرح

الجزء الثالث: 30 قطعة قراءة من بعد أول 70 قطعة في الترتيب (من 71 إلى 100)، كما وردت في تجميعات المختبرين، مرتبة من الأكثر ذكرًا، ومع كل سؤال الإجابة وسببها من القطعة نفسها.

ملف مجاني من تطبيق ستيب

آخر تحديث: 5 نوفمبر 2026

انضم لقناة التطبيق على تليجرام (اختبار يومي مجاني): t.me/step_tajmeeat

كيف تستخدم الملف؟ وكيف تحل أسئلة القراءة؟

1 هذا هو الجزء الثالث

الجزء الأول فيه أول 40 قطعة في الترتيب (الأكثر تكرارًا)، والجزء الثاني من 41 إلى 70. هذا الملف يكمل بعدهما: القطع من 71 إلى 100 حسب عدد مرات ذكرها في تقارير المختبرين. اقرأ القطعة مرة سريعة، ثم حل أسئلتها، ثم صحّح من الإجابات اللي تحتها مباشرة.

2 الفكرة الرئيسية Main idea

أسئلة مثل What is the main idea أو best title: اقرأ أول جملة في كل فقرة. الإجابة الصحيحة تغطي القطعة كلها (أو الفقرة المطلوبة)، والخيارات الغلط تكون تفصيلة صغيرة أو فكرة أوسع من القطعة.

3 التفاصيل Detail

أسئلة مثل According to paragraph و What does the passage say: خذ كلمة مميزة من السؤال (اسم، رقم، سنة) وابحث عنها في القطعة، ثم اقرأ الجملة اللي فيها كاملة. الإجابة الصحيحة غالبًا نفس المعنى بكلمات ثانية.

4 معنى الكلمة Vocabulary

أسئلة closest in meaning to: ارجع للكلمة في الفقرة، واقرأ الجملة قبلها وبعدها، ثم ضع كل خيار مكان الكلمة؛ الخيار اللي يحافظ على معنى الجملة هو الصحيح.

5 الضمير يعود على ماذا؟ Reference

أسئلة The word it / they / his refers to: ارجع للخلف وابحث عن أقرب اسم قبل الضمير يناسبه في العدد (مفرد أو جمع) والمعنى، وجرّب تضعه مكان الضمير.

6 الاستنتاج Inference

أسئلة What can we understand و fact or opinion: الإجابة غير مكتوبة حرفيًا لكنها تُفهم من القطعة بوضوح. ارفض أي خيار يضيف معلومة غير موجودة. والرأي opinion هو كلام يحتمل الاختلاف مثل I believe أو suggest، والحقيقة fact رقم أو حدث يمكن التأكد منه.

تبي تتدرب أكثر؟ في تطبيق «ستيب STEP: تجميعات متكررة» مئات القطع والأسئلة من نفس التجميعات، مع شرح عربي لكل سؤال واختبارات تجريبية ومتابعة لأخطائك.

أرقام الصفحات هي الأرقام المكتوبة أسفل كل صفحة. «مرات ذكرها» = عدد مرات ذكر القطعة في تقارير المختبرين. هذه القطع تأتي في الترتيب بعد أول 70 قطعة (الجزءان الأول والثاني)، ومرتبة من الأكثر تكرارًا إلى الأقل.

ذكرها المختبرون 10 مرات

4 أسئلة

01 الأعراف الثقافية بين الغرب وشرق آسيا
Cultures and Social Norms

Cultures differ in terms of the particular norms that they find important and that guide the behavior of the group members. Social psychologists have found that there is a fundamental difference in social norms between Western cultures and East Asians cultures. Norms in Western cultures are primarily oriented toward individualism, selfenhancement and independence. Children in Western cultures feel special about themselves. They enjoy getting gold stars on their projects and the best grade in the class. Adults in Western cultures are oriented toward promoting their own individual success, frequently in comparison with others.

Norms in the East Asian cultures, on the other hand, are more focused on other-concern. These norms indicate that people should be more fundamentally connected with others and thus are more oriented toward interdependence, or collectivism. In East Asian cultures, children are taught to focus on developing harmonious social relationships with others, and the predominant norms relate to group togetherness, connectedness, and duty and responsibility to one's family. As one example of these cultural differences, research conducted by Shinobu Kitayama and his colleagues found that East Asians were more likely than Westerners to experience happiness as a result of their connections with other people, whereas Westerners were more likely to experience happiness as a result of their own personal accomplishments.

It is important to be aware of cultures and cultural differences, at least in part because people with different cultural backgrounds are increasingly coming into contact with each other as a result of increased travel and immigration and the development of the internet and other forms of communication. In the United States, for instance, there are many different ethnic groups, and the proportion of the population that comes from minority groups is increasing from year to year. Being aware of cultural differences and considering their influence on how we behave toward others in an important part of a basic understanding of social psychology.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

1 معنى كلمة

What idea does the expression 'personal accomplishments' repeat?

A Social relationship
B Individual success
C Predominant norms
D Cultural differences

2 استنتاج

How is the Western culture's view of happiness different from the Eastern culture's view?

A It is linked to past experiences.
B It is linked to physical health.
C It is linked to relationship.
D It is linked individuals.

ملف مجاني من تطبيق ستيب — Google Play و App Store

استنتاج

3 What can we understand about Western cultures from paragraph (1)?

A They respect social duties.
B They encourage competition.
C They promote artistic values.
D They rely on modern technology.

استنتاج

4 What can we understand about cultures from paragraph (3)?

A They are dynamic.
B They act in isolation.
C They are hard to analyze.
D They have several levels.

01 الإجابات مع الشرح

1 B Individual success

السبب العبارة personal accomplishments تعني إنجازات الشخص نفسه، أي نجاحه الفردي Individual success؛ والقطعة تقول إن الغربيين تسعدهم إنجازاتهم الشخصية.

> *Westerners were more likely to experience happiness as a result of their own personal accomplishments*

ليه الباقي غلط Social relationship هي مصدر سعادة الشرقيين وليس الغربيين.

2 D It is linked individuals.

السبب سعادة الشرقيين ترتبط بعلاقاتهم مع الناس، أما سعادة الغربيين فترتبط بالفرد وإنجازاته، فالخيار D هو الفرق.

> *East Asians were more likely than Westerners to experience happiness as a result of their connections with other people, whereas Westerners were more likely to experience happiness as a result of their own personal accomplishments*

ليه الباقي غلط C هو وصف الثقافة الشرقية وليس الغربية.

3 B They encourage competition.

السبب الفقرة 1 تقول إن الكبار في الثقافات الغربية يسعون لنجاحهم الفردي «بالمقارنة مع الآخرين»، وهذا يعني تشجيع المنافسة.

> *Adults in Western cultures are oriented toward promoting their own individual success, frequently in comparison with others.*

ليه الباقي غلط احترام الواجبات الاجتماعية A صفة الثقافات الشرقية في القطعة.

4 A They are dynamic.

السبب الفقرة 3 تقول إن أصحاب الخلفيات الثقافية المختلفة يلتقون أكثر فأكثر، وإن نسبة الأقليات تزيد كل سنة؛ أي أن الثقافات تتغير وتتفاعل، فهي dynamic.

> *people with different cultural backgrounds are increasingly coming into contact with each other ... the proportion of the population that comes from minority groups is increasing from year to year*

ليه الباقي غلط لا شيء في القطعة يقول إن الثقافات منعزلة B أو صعبة التحليل C.

02 الكلمات القوية
Forceful Words

ذكرها المختبرون 10 مرات
سؤال واحد

If a person wants to be forceful, and really get his message across, then he should be brief; because words are like sunbeams – the more they are condensed, the deeper they burn.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

معنى كلمة

5 The word forceful in the passage is closest in meaning to _____.

A sharp B smart C mindful D powerful

02 الإجابات مع الشرح

5 D powerful

السبب: forceful = قوي ومؤثر، أي powerful؛ والقطعة تقول إن الكلمات المختصرة تحرق أعمق كأشعة الشمس إذا ركّزتها، يعني أثرها أقوى.

If a person wants to be forceful, and really get his message across, then he should be brief

ليه الباقي غلط: smart و mindful تعني ذكيًا ومنتبهًا، وليس فيها معنى القوة في التأثير.

ستيب STEP: تجميعات متكررة

03

مساكن الحيوانات
Animal Habitats

ذكرها المختبرون 10 مرات

5 أسئلة

Animal Habitats

(1) Humans are not the only species on Earth capable of building extraordinary structures. The natural world is in fact full of ingenious animals that can achieve just as impressive feats of engineering.

(2) Building behavior is common in mammals, birds, insects and arachnids. Many animals learn to build by observation and even through communication. However, in some cases building is thought to be instinctive.

(3) Animals will often construct their own habitats for shelter against potential predators and the outside elements. Many dwellings are also built for nesting purposes and to catch, store and even cultivate food.

(4) Animal architecture can also be quite sophisticated; with many structures incorporating clever ventilation systems for temperature control, and even secure entry and exit points to keep unwanted visitors away.

(5) Complex builds are often undertaken as a group, which helps speed up construction time. Take for example the humble ant. An army of ants can move up to 50 tons of soil per year in just 2.6 square kilometers. A single ant is capable of carrying up to 50 times its own weight, so working together as a colony means they're able to accomplish impressive feats. In fact, within a week, a large army of garden ants can construct an underground city big enough to house thousands of insects.

(6) Established deep underground, ant nests are made up of multiple chambers and connecting tunnels. Each chamber has a different use; some store food while others are used as nurseries for the young and resting spaces for busy worker ants and the deepest central chamber is where the queen ant lays her eggs.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

6 **Which sentence gives the main idea of Paragraph (5)?**

الفكرة الرئيسية

A Take for example the humble ant.

B An army of ants can move up to 50 tons of soil per year in just 2.6 square kilometers.

C Complex builds are often undertaken as a group, which helps speed up construction time.

D A single ant is capable of carrying up to 50 times its own weight, so working together as a colony means they're able to accomplish impressive feats.

ملف مجاني من تطبيق ستيب — Google Play و App Store

تفاصيل

7 **What does Paragraph (1) say about the natural world?**

A Humans are the only capable species.
B The Earth is made of extraordinary structures.
C Engineers can help us build impressive things.
D Animals can match humans in creating structures.

تفاصيل

8 **Which of the following statements about building behavior does Paragraph (2) support?**

A It is usual for all animal species.
B There are different ways animals learn to build.
C Animals need to be taught to build complex structures.
D Communication between insects and birds leads to stronger structures.

تفاصيل

9 **What does Paragraph (3) reveal about animal constructions?**

A Nests are built in the outside elements.
B The constructions have many purposes.
C Construction is done under the ground.
D Animals construct habitats for other animals.

تفاصيل

10 **Which statement about animal architecture in Paragraph (5) is correct?**

A Ants build their cities in groups.
B An ant army protects its colonies.
C Ants construct their habitat in many weeks.
D A single ant can move 50 tons of soil in a year.

03 الإجابات مع الشرح

6 **C Complex builds are often undertaken as a group, which helps speed up construction time.**

السبب الفقرة 5 تبدأ بفكرتها الرئيسية: البناء المعقد يتم غالبًا كمجموعة فيسرّع العمل. وباقي الجمل أمثلة على النمل.

Complex builds are often undertaken as a group, which helps speed up construction time.

ليه الباقي غلط A و B و D أمثلة وتفاصيل عن النمل وليست الفكرة العامة.

ستيب STEP تجميعات متكررة

7 **D** Animals can match humans in creating structures.

السبب الفقرة 1 تقول إن البشر ليسوا النوع الوحيد القادر على بناء هياكل مذهلة، وإن الحيوانات تنجز إنجازات هندسية بنفس الروعة.

> *Humans are not the only species on Earth capable of building extraordinary structures ... can achieve just as impressive feats of engineering*

ليه الباقي غلط A عكس أول جملة في القطعة.

8 **B** There are different ways animals learn to build.

السبب الفقرة 2 تذكر أكثر من طريقة: بعض الحيوانات تتعلم البناء بالملاحظة أو بالتواصل، وفي بعض الحالات يكون البناء غريزيًا.

> *Many animals learn to build by observation and even through communication. However, in some cases building is thought to be instinctive.*

ليه الباقي غلط A غير صحيح لأن القطعة تذكر فئات محددة فقط (الثدييات والطيور والحشرات والعناكب).

9 **B** The constructions have many purposes.

السبب الفقرة 3 تذكر أكثر من غرض للبناء: الحماية من المفترسات والعوامل الخارجية، والتعشيش، وصيد الطعام وتخزينه وزراعته.

> *construct their own habitats for shelter against potential predators and the outside elements. Many dwellings are also built for nesting purposes and to catch, store and even cultivate food*

ليه الباقي غلط D غير صحيح: الحيوانات تبني مساكن لنفسها وليس لحيوانات أخرى.

10 **A** Ants build their cities in groups.

السبب الفقرة 5 تقول إن البناء المعقد يتم غالبًا كمجموعة، وإن النمل يبني مدينة كاملة تحت الأرض معًا.

> *Complex builds are often undertaken as a group ... within a week, a large army of garden ants can construct an underground city*

ليه الباقي غلط D خطأ: الذي ينقل 50 طنًا هو جيش النمل كله وليس نملة واحدة، و C خطأ لأن البناء يتم خلال أسبوع.

04 هل التلفزيون يقتلك؟
Is Your Television Killing You?

ذكرها المختبرون 9 مرات
3 أسئلة

(1) Is your television killing you? Did you know that every hour you spend watching it can take 22 minutes off of your life? This means that viewing for an average of six hours a day can cut short your life by five years!

(2) The above information is based on a study done by a group of researchers at the University of Queensland, Australia. The inactivity associated with TV viewing is dangerous and gives greater opportunities for unhealthy overeating. The researchers also showed that a sedentary lifestyle is as bad for health as smoking cigarettes. The scientists calculated that half an hour of watching TV' is equivalent to smoking one cigarette, with both cutting 11 minutes off a lifespan. Australians watch TV for an average of six hours per day and health effects are likely to be similar in other industrialized countries: the average amount of time spent watching TV daily is four hours in the UK and five hours in the United States.

(3) An earlier study associated television viewing with the risk of developing type-2 diabetes and heart disease, as well as with the risk of early death. That research showed that these risks rose by 20% for people who spend just two hours a day in front of the TV.

(4) The good news is that exercising for just 15 minutes a day can increase your lifespan by up to three years. It can also reduce the risk of premature death by 14%. Each extra 15 minutes of exercise added to that can decrease this risk by another 4%.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

11 تفاصيل

According to the passage, what activity can increase the health risks of diabetes and heart disease by 20%?

A watching TV for two hours a day
B a generally inactive lifestyle
C unhealthy eating
D smoking

12 تفاصيل

According to paragraph (4), exercising for 15 minutes daily can _____

A add three years to your total lifetime
B lengthen your lifetime by 22 minutes
C decrease the risk of death by 4%
D lower heart disease by 4%

13 معنى كلمة

The word "premature" in Paragraph (4) is closest in meaning to _____

A late
B early
C final
D developing

ملف مجاني من تطبيق ستيب — App Store و Google Play

04 الإجابات مع الشرح

11 **A watching TV for two hours a day**

السبب الفقرة 3: الدراسة الأقدم ربطت مشاهدة التلفزيون بخطر السكري وأمراض القلب، وارتفع الخطر 20% لمن يشاهد ساعتين يوميًا فقط.

> *these risks rose by 20% for people who spend just two hours a day in front of the TV*

12 **A add three years to your total lifetime**

السبب الفقرة 4: التمرين 15 دقيقة يوميًا يزيد العمر حتى 3 سنوات.

> *exercising for just 15 minutes a day can increase your lifespan by up to three years*

ليه الباقي غلط 4% هي نسبة خفض الخطر لكل 15 دقيقة إضافية، وليست نتيجة الـ 15 دقيقة الأولى.

13 **B early**

السبب premature = مبكر، أي early؛ المقصود الوفاة المبكرة.

> *reduce the risk of premature death by 14%*

ستيب STEP: تجميعات متكررة

05 حين يجف البئر
When the Well's Dry

ذكرها المختبرون 9 مرات
سؤال واحد

"When the well's dry, we know the worth of water."

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

معنى كلمة

14 The passage is closest in meaning to _____

A Nothing lasts forever, but we DON'T normally think about that.
B We DON'T know how valuable something is until it is NOT available.
C It is a good idea to start a business storing water for the future.
D Water is especially important in desert areas.

05 الإجابات مع الشرح

14 **B We DON'T know how valuable something is until it is NOT available.**

السبب: المثل يقول إننا نعرف قيمة الماء فقط عندما يجف البئر، أي لا نعرف قيمة الشيء إلا عندما نفقده.

When the well's dry, we know the worth of water.

ليه الباقي غلط: A و C و D لا علاقة لها بمعنى المثل.

ستيب STEP تجميعات متكررة

06

القيادة الاستبدادية والديمقراطية
Autocratic and Democratic Leadership (Passages A and B)

ذكرها المختبرون 9 مرات

سؤالان

Passage A: Autocratic leadership

(1) This is also sometimes termed authoritarian leadership. It refers to a leadership or management style which assumes that information and decision making are best kept at the top of the organization. It is also characterized by:
- One-way communication (downward).
- Minimal delegation or decentralization.
- Close supervision of employees.

(2) Martha Stewart, an American entrepreneur, built up a vast global business venture, including publishing, television broadcasting and online commerce, despite, or perhaps because of, her reputation as an autocratic leader. Under this style, the leader determines objectives, allocates tasks and expects obedience from subordinates. In these circumstances employees become very dependent upon the leader as they do not have the necessary information (or confidence) to act on their own initiative.

(3) Organizations managed in an authoritarian style can face difficulties. People avoid making decisions so that matters to be decided are either passed up for the decisions to be made at a higher level, or decisions are made by committees as it is more difficult to dismiss all the members of a committee for jointly making a wrong decision. Senior management tends to be overworked and staff turnover tends to be high. This style of leadership becomes difficult to operate successfully as an organization grows.

(4) As with all the behavioral leadership classifications, the term autocratic manager covers a spectrum of styles. Extreme autocratic management will result in subordinates having no freedom of action. Less extreme autocratic leadership will allow for the possibility of some discussion or persuasion. This implies that limited two-way communication may occur.

Passage B: Democratic leadership

(1) Democratic leadership (sometimes called participative leadership) entails operating a business according to decisions agreed by the majority. Decisions may be agreed formally through a voting system but are more likely to be the result of informal discussions. Typically, democratic leadership encourages some of the following:
- The leader delegates a great deal and encourages decentralization.
- The leader and subordinates discuss issues and employee participation is actively encouraged.
- The leader acts upon advice, and explains the reasons for decisions.
- Subordinates have greater control over their own working lives.

ملف مجاني من تطبيق ستيب — Google Play و App Store

(2) The successful operation of this style requires excellent communication skills on the part of the leader and the ability to generate effective two-way communications. A considerable amount of management time may be spent on communication in one form or another. This approach helps to develop the skills of subordinates and generally results in a more satisfied workforce.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

تفاصيل

15 **According to passages A and B, what type of communication can take place in both leadership styles?**

A downward B limited C two-way D informal

استنتاج

16 **What can we understand from Passages A and B about leadership styles?**

A They only include downward communication
B They influence how decisions are made.
C The leader delegates a great deal.
D Workers depend on their leaders.

06 الإجابات مع الشرح

15 **C two-way**

السبب القطعة A تقول إن الاتصال ثنائي الاتجاه المحدود قد يحدث، والقطعة B تقول إن القائد الديمقراطي يولد اتصالًا ثنائي الاتجاه فعالًا؛ فالمشترك هو two-way.

> *This implies that limited two-way communication may occur ... the ability to generate effective two-way communications*

ليه الباقي غلط downward خاص بالقيادة الاستبدادية فقط.

16 **B They influence how decisions are made.**

السبب القطعتان تتكلمان عن الطريقة التي تُتخذ بها القرارات: في الاستبدادية يحتفظ القمة بالقرار، وفي الديمقراطية القرار حسب الأغلبية.

> *information and decision making are best kept at the top of the organization ... entails operating a business according to decisions agreed by the majority*

ليه الباقي غلط A يخص القيادة الاستبدادية، و C يخص القيادة الديمقراطية، فلا يصلحان لوصف الأسلوبين معًا.

ستيب STEP تجميعات متكررة

07

العولمة
Globalization

ذكرها المختبرون 8 مرات

6 أسئلة

(1) Many people think globalization is a new phenomenon. In fact, this process has been happening for thousands of years. For example, some very old Chinese artifacts have been found in North and South America, and antique Arabian money has been found as far north as Norway.

(2) What is even more remarkable is how quickly plants from the New World became staples in the Old World. Hungarian cooking. For example, is famous for use of red peppers, and the Irish and famous for eating potatoes. Indian food is an even better example. People in many countries now often eat Indian food. They seem to enjoy the idea that is the "traditional" but what is really in it? In many "traditional" Indian dishes, you will probably find potatoes, tomatoes, squash, corn, and sweet peppers. Your food may be cooked in peanut oil and have peanuts and cashew nuts sprinkled on top. For dessert you may have guavas or papaya.

(3) We think of all this food as "traditional" Indian food. Yet sailors brought all these plants to India from America on ships after 1500. We can also assume that they took a long time to spread and become popular in their new homes. So really, they are not that traditional-they are relatively new. And the same is true for traditional food in many places. The chili pepper for instance is a main part of the diet from South Africa to Hungary, from Mexico to Spain, to Yemen to India to China, but it originated in the Americas. So Globalization is really nothing new. We can learn a lot about globalization today by studying patterns of globalization in the past. It is a process that has been happening since man began to trade.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

17 تفاصيل

According to paragraph (1). Globalization is often assumed to be a recent development. In fact, globalization _____

A Originated with the Chinese
B Went as far north as Norway
C Has been going on for a long time
D Is evidenced in North and South America

18 تفاصيل

In paragraph (1). Discovered artifacts and antiques came originally from _____ "

A China and Arabia
B Norway and China
C North and South America
D Arabia and North America

تفاصيل

19 **According to paragraph (3), where did most of the plants mentioned in the passage originate?**

A In North America
B In Asia and the Americas
C In North and South America
D In North America and Europe

معنى كلمة

20 **The word antiques in paragraph (1) is closest in meaning to _____ "**

A Traditional
B Very distant
C Metallic
D Very Old

استنتاج

21 **How does the author use a discussion of plants?**

A To show how they can add variety to our diet
B To show how quickly new ones spread
C As an example of globalization
D To describe Indian food

استنتاج

22 **If the passage continued it would probably show why globalization _____**

A Was uncommon in the Old World
B Was irrelevant to some societies
C Is important today
D Is to be discarded

07 الإجابات مع الشرح

17 **C Has been going on for a long time**

السبب: الكاتب يقول إن العولمة ليست ظاهرة جديدة، بل تحدث منذ آلاف السنين.

> *this process has been happening for thousands of years*

18 **A China and Arabia**

السبب: القطعة تقول إن آثارًا صينية قديمة وُجدت في الأمريكتين، ونقودًا عربية قديمة وُجدت في النرويج؛ فمصدرها الصين والجزيرة العربية.

> *some very old Chinese artifacts have been found in North and South America, and antique Arabian money has been found as far north as Norway*

19 **C In North and South America**

السبب: القطعة تقول إن البحارة جلبوا هذه النباتات إلى الهند من أمريكا، وإن الفلفل الحار أصله من الأمريكتين.

> *sailors brought all these plants to India from America on ships after 1500 ... it originated in the Americas*

ليه الباقي غلط: B فيه آسيا، والقطعة تقول إن الأصل من الأمريكتين.

20 **D** Very Old

السبب antiques = أشياء قديمة جدًا، أي Very Old؛ مثل النقود العربية القديمة.

> *antique Arabian money*

21 **C** As an example of globalization

السبب الكاتب يستعمل النباتات (البطاطس والطماطم والفلفل) مثالًا على أن العولمة ليست جديدة؛ والنتيجة في آخر القطعة.

> *sailors brought all these plants to India from America on ships after 1500 ... So Globalization is really nothing new*

ليه الباقي غلط D الطعام الهندي مثال داخل الفكرة وليس هدف الكاتب.

22 **C** Is important today

السبب آخر القطعة تقول إننا نتعلم الكثير عن العولمة اليوم بدراسة أنماطها في الماضي؛ فالتكملة المتوقعة تتكلم عن أهمية العولمة اليوم.

> *We can learn a lot about globalization today by studying patterns of globalization in the past.*

ستيب STEP: تجميعات متكررة

سؤال واحد

08 الاستيراد والتصدير (تجارة التوابل)
Importing and Exporting

Importing and Exporting

(1) The history of importing and exporting dates back to the Roman Empire, when European and Asian traders imported and exported goods across the vast lands of Eurasia. Trading along the Silk Road flourished during the thirteenth and fourteenth centuries. Caravans filled with imports from China and India came over the desert to Constantinople and Alexandria. From there, Italian ships transported the goods to European ports.

(2) For centuries, importing and exporting has often involved middlemen, due in part to the long distances traveled and different native languages spoken. The spice trade of the 1400s was no exception. Spices were very much in demand because Europeans had no refrigeration, which meant they had to preserve meat using large amounts of salt or risk eating half-rotten flesh. Spices disguised the otherwise poor flavor of the meat. Europeans also used spices as medicines. The European demand for spices gave rise to the spice trade. The trouble was that spices were difficult to obtain because they grew in jungles half a world away from Europe. The overland journey to the spice-rich lands was difficult and involved many middlemen along the way. Each middleman charged a fee and thus raised the price of the spice at each point. By the end of the journey, the price of the spice was inflated 1,000 percent.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

23 تفاصيل

Why did the writer write this passage?

A to entertain
B to persuade
C to explain
D to give an example

08 الإجابات مع الشرح

23 C to explain

السبب القطعة تشرح تاريخ الاستيراد والتصدير، ولماذا صار سعر التوابل مرتفعًا؛ فهدف الكاتب to explain، ولا يحاول إقناعك بشيء.

> *The European demand for spices gave rise to the spice trade. The trouble was that spices were difficult to obtain*

Project Organization

ذكرها المختبرون 7 مرات
سؤالان

Project organization

(1) There is no single organizational approach to projects. Each project is organized to accomplish the work effectively and efficiently. Several factors influence the organizational approach to execute a project. The complexity profile of a project, the culture of the parent organization, the preferences of the project manager, the knowledge and skills of the team, and a parent organization with a project management office are examples of factors that influence the project's organization.

(2) In developing the project organizational structure, the project manager considers the span of control for each manager. The span of control represents the number of people reporting to a manager.

(3) Most projects have similar functions that are important to successfully managing the project. Included among these are the following:
- Sponsor
- Project manager
- Controls
- Procurement
- Quality
- Administration

(4) On smaller projects, more than one function can be managed by one person. On larger projects, large teams may be needed to accomplish the work within the function.

Project Sponsor

(5) The project sponsor is outside the day-to-day operations of the project and has the organizational authority to provide resources and overcome barriers for the project. The project sponsor is typically a leader in the parent organization with an interest in the outcome of the project. As a leader in the parent organization, the project sponsor can provide input into the project scope and other documents that define project success. The guidance and support from the project sponsor enhances the ability of the project to successfully meet the parent organization's objectives.

Project Manager

(6) Project managers often have the breadth of responsibility associated with corporate chief executive officers (CEOs). The project manager facilitates the start-up of a project and develops the staff, resources, and work processes to accomplish the work of the project. He or she manages the project effectively and efficiently and oversees the closeout phase. Some projects are larger than major divisions of some organizations, with the project manager responsible for a larger budget and managing more risk than most of the organizational leaders. A mining company that builds a new mine in South Africa, an automobile manufacturer that creates a new truck design,

ملف مجاني من تطبيق ستيب — Google Play و App Store

and a pharmaceutical company that moves a new drug from testing to production are examples of projects that may consume more resources in a given year than any of the organization's operating divisions.

(7) The function of the project manager can vary depending on the complexity profile and the organizational structure. Defining and managing client expectations and start-up activities, developing the scope, and managing change are functions of the project manager. On some projects, the project manager may provide direction to the technical team on the project. On other projects, the technical leadership might come from the technical division of the parent organization.

(8) Although the functional responsibilities of the project manager may vary, the primary role is consistent on every project. The primary role of the project manager is to lead: to provide a vision of success, to connect everyone involved in the project to that vision, and to provide the means and methods to achieve success. The project manager creates a goal-directed and time focused project culture. The project manager provides leadership.

Project Procurement

(9) The approach to purchasing the supplies and equipment needed by the project is related to the complexity profile of the project. A small project with a low complexity level may be able to use the procurement services of the parent organization. In an organization where project resources reside in various departments, the departments may provide the supplies and equipment each team member of the project may need.

Project Quality

(10) Project quality is often part of the technical manager's responsibility. On large projects or projects with a high degree of technical complexity, the quality is sometimes a separate function reporting to the project manager. The project quality manager focuses on the quality of the project work processes and not the quality of the client's product. For example, if the project is to design and construct an automobile factory, the quality manager focuses on the project work processes and meeting the technical specification of the equipment installed by the project team. The project quality manager is not responsible for the quality of the car the plant produces. If the plant functions to the defined project specifications, the quality of the plant output is the responsibility of the plant quality department, and it may take several months for the plant to refine the work processes to meet the design specifications of the car.

Project Administration

(11) The administrative function provides project specific support such as the following:

- Accounting services
- Legal services
- Property management
- Human resources (HR) management
- Other support functions found in most organizations

In most organizations, support for these functions is provided by the parent organization. For example, people assigned to the project will get human resources (HR) support from the HR department of the parent organization. Salary, benefits, and HR policies for employees assigned to

the project will be supported out of the HR department. The parent organization will provide accounting functions such as determining the cost of cash, taxes, year-end project reports, and property disposal at the end of the project.

Psychoanalysis

What are the aims and methods of psychoanalysis?

(1) Although most of today's therapists do not practice therapy as Sigmund Freud did, his psychoanalytic techniques survive. Psychoanalysis is part of our modern vocabulary, and its assumptions influence many other therapies.

Aims

(2) Psychoanalysis assumes that many psychological problems are fueled by childhood's residue of supposedly repressed impulses and conflicts. Psychoanalysts try to bring these repressed feelings into conscious awareness, where the patient can deal with them. By gaining insight into the origins of the disorder – by fulfilling the ancient imperative to "know thyself" in a deep way – the patient "works through" the buried feelings. The theory presumes that healthier, less anxious living becomes possible when patients release the energy they had previously devoted to id-ego-superego conflicts.

(3) Psychoanalysis is historical reconstruction. Its goal is to unearth the past in hope of unmasking the present. But how?

(4) When Freud discarded hypnosis as unreliable, he turned to free association. Imagine yourself as a patient using the free association technique. The analyst invites you to relax, perhaps by lying on a couch. He or she will probably sit out of your line of vision, helping you focus attention on your internal thoughts and feelings. Beginning with a childhood memory, a dream, or a recent experience, you say aloud whatever comes to your mind from moment to moment. It sounds easy, but soon you notice how often you edit your thoughts as you speak, omitting material that seems trivial, irrelevant or shameful. Even in the safe presence of the analyst, you may pause momentarily before uttering an embarrassing thought. You may make a joking remark or change the subject to something less threatening. Sometimes your mind may go blank or you may find yourself unable to remember important details.

(5) To the psychoanalyst, these blocks in the flow of your free associations indicate resistance. They hint that anxiety lurks and that you are repressing sensitive material. The analyst will want to explore these sensitive areas by making you aware of your resistances and by interpreting their underlying meaning. The analyst's interpretations-suggestions of underlying wishes, feelings, and conflicts – aim to provide people with insight. If offered at the right moment, the analyst's interpretation – of, say, your not wanting to talk about your mother – may illuminate what you are avoiding. You may then discover what your resistances mean and how they fit with other pieces of your psychological puzzle.

(6) Freud believed that another clue to repressed impulses is your dreams' hidden content. Thus, after inviting you to report a dream, the analyst may offer a dream analysis, suggesting its hidden meaning.

ملف مجاني من تطبيق ستيب — Google Play و App Store

(7) During many such sessions you will probably disclose more of yourself to your analyst than you have ever revealed to anyone. Because psychoanalytic theory emphasizes the formative power of childhood experiences, much of what you reveal will pertain to your earliest memories. You will also probably find yourself experiencing strong positive or negative feelings for your analyst. Such feelings may express the dependency or mingled love and anger that you earlier experienced toward family members or other important people in your life. When this happens, Freud would say you are actually transferring your strongest feelings from those other relationships to the analyst. Analysts and other therapists believe that this transference exposes long-repressed feelings, giving you a belated chance to work through them with your analyst's help. By examining your feelings toward the analyst, you may also gain insight into your current relationships.

(8) Note how much of psychoanalysis is built on the assumption that repressed memories exist. That assumption is now questioned. This challenge to an assumption that is basic to so much of professional and popular psychology is provoking intense debate.

(9) Critics also say that psychoanalysts' interpretations are hard to refute. If, in response to the analyst's suggested interpretation, you say, «Yes! I see now», your acceptance confirms the analyst's interpretation. If you emphatically say, «No! That doesn't ring true,» your denial may be taken to reveal more resistance, which would also confirm the interpretation. Psychoanalysts acknowledge that it's hard to prove or disprove their interpretations. But they insist that interpretations often are a great help to patients.

(10) Traditional psychoanalysis is slow and expensive. It requires up to several years of several sessions a week with a highly trained and well-paid analyst. (Three times a week for just two years at $100 or more per hour comes to about $30,000.) Only those with a high income can afford such treatment.

(11) Although there are relatively few traditional psychoanalysts, psychoanalytic assumptions influence many therapists, especially those who make psychodynamic assumptions. Psychodynamic therapists try to understand patients' current symptoms by exploring their childhood experiences. They probe for supposed repressed, emotion-laden information. They seek to help people gain insight into the unconscious roots of problems and work through newly resurrected feelings. Although influenced by Freud's psychoanalysis, these therapists may talk to people face to face (rather than out of the line of vision), once a week (rather than several times weekly), and for only a few weeks or months (rather than several years).

Cultural Norms

ذكرها المختبرون 7 مرات
4 أسئلة

Cultural Norms

(1) Humans are social creatures. People have always grouped together into communities in order to survive. Living together, people form common habits and behaviors-from specific methods of childrearing to preferred techniques for obtaining food. In modern-day Paris, many people shop daily at outdoor markets to pick up what they need for their evening meal, buying cheese, meat, and vegetables from different specialty stalls. In the United States, the majority of people shop once a week at supermarkets, filling large carts to the brim. How would a Parisian perceive U.S. shopping behaviors that Americans take for granted?

(2) Almost all human behavior, from shopping to marriage to expressions of feelings, is learned in the United States, people tend to view marriage as a choice between two people, based on mutual feelings of love. In other nations and in other times, marriages have been arranged through an intricate process of interviews and negotiations between entire families.

(3) To someone raised in New York City, the marriage customs of a family from Nigeria may seem strange, or even wrong. Conversely, someone from a traditional Kolkata family might be perplexed with the idea of romantic love as the foundation for lifelong commitment. In other words, the way in which people view marriage depends largely on what they have been taught

(4) Behavior based on learned customs is not a bad thing. Being familiar with unwritten rules helps people feel secure and "normal." Most people want to live their daily lives confident that their behaviors will not be challenged or disrupted. But even an action as seemingly simple as commuting to work evidences a great deal of cultural propriety.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

29 What has the greatest effect on people's ideas about marriage today?
تفاصيل

A their ideas about romantic love
B what they have seen in popular films

اكتشاف الحمض النووي
The Discovery of DNA (Passages A and B)

ذكرها المختبرون 6 مرات

سؤال واحد

Passage A: How did the discovery of DNA impact the scientific community?

(1) From the time DNA was first identified as a distinct molecule within cells, our understanding of DNA has grown as members of the scientific community have built upon each other's finding through farther experiments. The discovery of DNA focused scientists' efforts and led to the research into genetics and heredity aimed at improving life on Earth today.

Identification of DNA

(2) DNA's discovery can be traced to 1868, when Swiss medical student Johann Friedrich Miescher began work on isolating proteins from white blood cells. Miescher found a substance that contained more phosphorus than cellular proteins and could not be broken down as proteins could. His discovery of what he called "nuclein" proved an important key for scientists decades later who were trying to determine which chemical components of cells carried genetic information.

Investigation into DNA's Function and Structure

(3) In the 1940s. American biologist Oswald Avery and colleagues at Rockefeller University exposed one type of pneumonia bacteria to the DNA from another type without any proteins present, transforming the first type into the second and demonstrating that DNA was the agent of change. A decade later, James Watson and Francis Crick of Cambridge University suggested that DNA carried information in a code that aided in protein synthesis and existed as a double-stranded molecule, or double helix, structure, that carried the instructions for copying itself and transferring genetic material across generations.

Application to a Broad Range of Fields

(4) Today, our understanding of DNA's role and structure guides procedures and research in fields from agriculture to law. The ability to identify specific genes has assisted plant breeders in producing crops with hardy, desirable traits that result from the proteins DNA helps create. Meanwhile, analysis of the 1 percent of DNA sequences that vary among human beings has been useful in identifying persons of interest from biological evidence found at the scenes of violent crimes

Integration into Medical Research

(5) Experiments with DNA have probably had the greatest impact on medicine, especially in developing drugs and identifying and treating cancer. In 2013, researchers at Queen Mary University in London announced chemical "tags" on DNA sequences that seemed to coincide with occurrences of head and neck cancers, suggesting these cancers could be predicted. Coupling these tests with gene therapy-the alteration of genes known to play roles in cancer-could create a legacy unimaginable when DNA was first discovered.

Passage B: The discovery of DNA

(1) It is a common misconception that James Watson and Francis Crick discovered DNA in the 1950s. In reality, DNA was discovered decades before. It was by following the work of the pioneers before them that James and Francis were able to come to their ground-breaking conclusion about the structure of DNA in 1953. The story of the discovery of DNA begins in the 1800s...

The molecule of life

(2) The molecule now known as DNA was first identified in the 1860s during research into the key components of white blood cells, part of our body's immune system. The main source of these cells was pus-coated bandages collected from a nearby medical clinic.

(3) Researchers carried out experiments using salt solutions to understand more about what makes up white blood cells. They noticed that, when they added acid to a solution of the cells, a substance separated from the solution. This substance then dissolved again when an alkali was added. When investigating this substance, they realized that it had unexpected properties different to those of the other proteins they were familiar with. They called this mysterious substance "nuclein ", because they believed it had come from the cell nucleus.

The four building blocks of DNA

(4) Albrecht Kossel was a German biochemist who made great progress in understanding the basic building blocks of nuclein.

(5) In 1881 Albrecht identified nuclein as a nucleic acid and provided its present chemical name, deoxyribonucleic acid (DNA). This work was rewarded in 1910 when he received the Nobel Prize in Physiology or Medicine.

Disease Diagnosis and Treatment

(6) As noted, one important area of DNA research is that of genetics and medical research. Due to our discovery of DNA, our ability to actually diagnose diseases early on has been vastly improved. In addition, we have been able to better assess a person's genetic susceptibility to specific diseases. In doing so, we have also paved the pathway to formulate brand new drugs to treat these diseases. In fact, drugs can essentially be custom made to complement a person's personal biochemistry and genetic makeup.

(7) The impact of DNA on agriculture has been a very important one because it has allowed breeders to facilitate the breeding of animals that have a better resistance to diseases. It also allows farmers to produce more nutritious produce.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

33 **According to passages A and B, what fields have been helped by understanding DNA?** استنتاج

A medicine and engineering
B medicine and farming
C law and forensic
D farming and technology

3 أسئلة

13 المسؤولية المحدودة
Limited Liability

Limited liability means that if a business is unable to pay its debts the owners of the company can only lose the money that they have paid for shares. Sole traders and partnerships have unlimited liability. If the business cannot pay its debts, the owners have to pay them out of their own money. They may have to sell their house and other personal possessions to pay the business's creditors. The importance of limited liability is that people can put money into a firm by buying shares, without risking the loss of all their money if the company fails. If limited liability did not exist, people would be less willing to risk investing in firms.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

علم الإحصاء
Statistics

ذكرها المختبرون 5 مرات

4 أسئلة

(1) Statistics is a branch of mathematics. It involves gathering information and summarizing it. The numbers that result from this work are also called statistics. They can help to predict such things as the weather and how sports teams will perform. They also can describe specific things about large groups of people-for example, the reading level of students, the opinions of voters, or the average weight of a city's residents.

(2) The people who gather statistics are called statisticians. They collect pieces of information, or data, in three basic ways. They refer to trustworthy sources, such as newspapers and reports from reliable organizations. They perform scientific experiments. They also conduct surveys, or ask people questions.

(3) Sometimes statisticians cannot gather data about every member of a group, often because the group is too large. In such cases they study only part of the group, called a sample. A sample must accurately represent the larger population. For example, if women make up 60 percent of the population, then 60 percent of the sample must be women.

(4) Once statisticians have collected their information, they summarize it. They often put the data in graphs or charts, which are easier to read than long lists of data. Statisticians also summarize data by calculating numbers called averages. There are three kinds of averages: mean, mode, and median. The mean is the sum of a set of numbers divided by the number of elements in the set. The mode is simply the number that occurs most often in a sample. The median is the number right in the middle of the sample.

الأسئلة

40 C average

السبب القطعة تقول إن المتوسطات averages ثلاثة أنواع: mean و mode و median.

Statisticians also summarize data by calculating numbers called averages. There are three kinds of averages: mean, mode, and median.

15

الكويكبات
Asteroids

ذكرها المختبرون 5 مرات

3 أسئلة

Asteroids are very small, irregularly shaped, rocky bodies. Asteroids orbit the sun, but they are more like giant rocks than planets. Since they are small, they do not have enough gravity to become round. They are too small to have an atmosphere. Except for a few of the largest asteroids, they are too small to have internal heat, so they are not geologically active. These asteroids can only change due to a collision. A collision may cause the asteroid to break up. It may create craters on the asteroid's surface. An asteroid may strike a planet if it comes near enough to be pulled in by its gravity.

Hundreds of thousands of asteroids have been found in our solar system. They are now being discovered at a rate of tens of thousands of new asteroids per year! The majority are located in between the orbits of Mars and Jupiter. This region is called the asteroid belt. There are many thousands of asteroids in the asteroid belt. Still, their total mass adds up to only about 4 percent of Earth's moon. Asteroids formed at the same time as the rest of the solar system. Although there are many in the asteroid belt, Jupiter's gravity kept the material in this region from forming into a planet, throwing much of it either out of the solar system or into the sun.

Near-Earth Asteroids

Near-Earth Asteroids have orbits that come near to or cross Earth's orbit. This means that they could possibly collide with Earth. There are over 10.000 known near-Earth asteroids. Small asteroids do sometimes collide with Earth. An asteroid about 5-10 m in diameter hits about once per year. About a thousand of the known near-Earth asteroids are much bigger. They are over 1 kilometer in diameter. When large asteroids hit Earth in the past, many organisms died. At times, many species became extinct. Astronomers keep looking for near-Earth asteroids. They hope to predict a possible collision early so they can try to stop it.

Meteors

If you look at the sky on a dark night, you may see a meteor, like in the figure below. A meteor forms a streak of light across the sky. People call them shooting stars because that's what they look like. But meteors are not stars at all. The light you see comes from a small piece of matter burning up as it flies through Earth's atmosphere.

Meteoroids

Before these small pieces of matter enter Earth's atmosphere, they are called meteoroids. Meteoroids are as large as boulders or as small as tiny sand grains. Larger objects are called asteroids; smaller objects are interplanetary dust. Meteoroids sometimes cluster together in long trails. They are the debris left behind by comets, when Earth passes through a comet trail, there is a meteor shower. During a meteor shower, there are many more meteors than normal for a night or two.

17 الانهيارات الثلجية
Avalanches

ذكرها المختبرون 5 مرات
3 أسئلة

Avalanches

Avalanches are mass movements of snow and ice. They move very fast and average speeds are 40-60 km/h, but speeds of up to 200 km/h have been recorded in Japan. Loose avalanches, made of fresh snow, usually occur soon after a large fall of snow. By contrast, slab avalanches occur at a later date, when the snow has developed some cohesion and unites together more. Slab avalanches are usually much larger than loose avalanches and cause much more destruction. They are often started by a sudden rise in temperature, which causes melting. This lubricates the slab and makes it unstable. Many of the avalanches occur in spring when the snowpack is large and temperatures are rising. There is also a relationship between the number of avalanches and altitude. For example, in the Swiss Alps most occur between 2000 meters and 2500 meters and there is diminished occurrence both higher up and lower down.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

معنى كلمة

46 The word slab in the passage is closest in meaning to _____

A chunk B altitude C speed D reduction

معنى كلمة

47 The word unites in the passage is closest in meaning to _____

A Relates B Appears C collapse D combines

معنى كلمة

48 The word unstable in the passage is closest in meaning to _____

A Firm B Safe C Loose D Large

17 الإجابات مع الشرح

46 A chunk

السبب: slab = كتلة، أي chunk؛ والقطعة تتكلم عن كتل ثلجية متماسكة أكبر وأكثر تدميرًا.

> *slab avalanches occur at a later date, when the snow has developed some cohesion and unites together more. Slab avalanches are usually much larger than loose avalanches*

ليه الباقي غلط: altitude (الارتفاع) و speed (السرعة) مذكورتان في القطعة لكنهما ليستا معنى slab.

ستيب STEP: تجميعات متكررة

ملف مجاني من تطبيق ستيب — App Store و Google Play

47 **D combines**

السبب unites = يتحد، أي combines؛ الثلج يتماسك ويلتصق ببعضه.

> *unites together more*

48 **C Loose**

السبب unstable = غير ثابت، فأقرب كلمة هي Loose (سائب غير متماسك)؛ وعكسها Firm و Safe.

> *This lubricates the slab and makes it unstable.*

الإحصاء (العينات والمجتمع)
Statistics (Samples and Populations)

ذكرها المختبرون 5 مرات

سؤالان

Statistics

(1) In statistics, we generally want to study a population. You can think of a population as a collection of persons, things, or objects under study. To study the population, we select a sample. The idea of sampling is to select a portion of the larger population and study that portion (the sample) to gain information about the population.

(2) Data are the result of sampling from a population. Because it takes a lot of time and money to examine an entire population, sampling is a very practical technique. If you wished to calculate the overall grade point average at your school, it would make sense to select a sample school. The data collected from the students who attend the sample would be the grade point averages. In presidential elections, opinion poll samples of 1,000 to 2,000 people are taken. The opinion poll is supposed to represent the views of the people in the entire country. Manufacturers of canned carbonated drinks take samples to determine if a 16-ounce can contains 16 ounces of carbonated drink. From the sample data, we can calculate a statistic. A statistic is a number that represents a property of the sample.

(3) One of the main concerns in the field of statistics is how accurately a statistic estimates a parameter. The accuracy really depends on how well the sample represents the population. The sample must contain the characteristics of the population in order to be a representative sample.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

49 تفاصيل

How can statistics be more accurate?

A by using a lot of time and money.
B by Finding the overall average
C by asking people's opinions.
D by using the right sample.

50 استنتاج

What does the writer think the selected sample should do?

A closely represent the population
B be the main concern of statistics
C be a small section of the population
D have more accuracy than an entire population

ستيب STEP: تجميعات متكررة

ملف مجاني من تطبيق ستيب — Google Play و App Store

18 الإجابات مع الشرح

49 **D** by using the right sample.

السبب الفقرة 3 تقول إن دقة الإحصاء تعتمد على مدى تمثيل العينة للمجتمع، أي اختيار العينة المناسبة.

> *The accuracy really depends on how well the sample represents the population.*

50 **A** closely represent the population

السبب الكاتب يرى أن العينة يجب أن تحمل خصائص المجتمع حتى تكون ممثِّلة له.

> *The sample must contain the characteristics of the population in order to be a representative sample.*

19 نظرية هيرزبرغ في التحفيز
Theory of Motivation (Herzberg)

ذكرها المختبرون 4 مرات
سؤال واحد

(1) Professor Frederick Herzberg was a clinical psychologist and later Professor of Management at the University of Utah. Herzberg carried out a motivation study on 200 accountants and engineers who worked in companies in the USA. These subjects of the study were asked two questions: When did you feel particularly good about your job? When did you feel really bad about your job?

(2) The responses that Herzberg obtained were interesting and fairly consistent. Reported good feelings were usually associated with job experiences and job content. One example of these was the head of an accounting department; he was given the job of installing new computer equipment. He took pride in his work and was pleased to know that the new equipment made a big difference in how his department performed.

(3) Reported bad feelings, on the other hand, were usually associated with the surrounding or peripheral aspects of the job-the job context. An example of these feelings was given by an engineer; his first job was routine record keeping and managing the office when the boss was gone. His boss was always too busy to train him and became annoyed if he tried to ask questions. The engineer said that he was frustrated in this job context and that he felt that he was just an unimportant assistant in a dead-end job.

(4) Herzberg concluded that job satisfiers are related to job content and that job dissatisfiers are related to job context. Herzberg named the satisfiers 'motivators' and he called the dissatisfiers 'hygiene factors'.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

51 The word consistent in Paragraph (2) is closest in meaning to _____ — معنى كلمة

A routine B steady C accurate D preserved

19 الإجابات مع الشرح

51 B steady

السبب: consistent = متسق ومتقارب، أي steady؛ إجابات المشاركين كانت متشابهة تقريبًا.

The responses that Herzberg obtained were interesting and fairly consistent.

20 سانت لوسيا
St. Lucia

(1) The Eastern Caribbean Island of St. Lucia is a part of a chain of volcanic islands known as the Lesser Antilles. St. Lucia is famous for its geothermal activity; heat from the earth's center creates natural hot pools and springs that attract tourists looking to relax in a natural bath!

(2) St. Lucia may only be a small island-43 kilometres long and a maximum of 23 kilometres wide (covering 16 square kilometres in total) but its landscape is mixed. There are volcanic beaches, coral diving sites, luxury holiday resorts and fishing villages, and 76 square kilometres of rich rainforest.

(3) The island of St. Lucia is known for its pair of pointy mountains, the Pitons, on its west coast. The west coast, where the capital city Castries is found, is met by the Caribbean Sea and is known for its amazing diving! The east coast of the island meets the Atlantic Ocean.

(4) The entire population of St Lucia is approximately 178,000 people, which is quite low. Over the centuries, this island has attracted settlers from all over the world, so it has a rich culture. A wide range of religions, music, languages and food can be found here.

(5) Most people were Amerindians, Caribs and European settlers (mainly from France). During the 19th century, waves of travelers from Europe, the Middle East, and even Japan made their lives in the Caribbean

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

52 What is the main topic of the passage? — الفكرة الرئيسية

A St. Lucia's tourism
B St. Lucia's history
C St. Lucia's culture
D St. Lucia's geography

53 What is one important idea related to St. Lucia's population that the writer mentions? — تفاصيل

A The population is mostly Amerindians.
B Its settlers are from the Middle East.
C It has a small number of people.
D It is a small island.

54 What does the writer want to show by the example of hot pools and springs? — استنتاج

A geothermal activity
B resort attractions
C a mixed landscape
D reasons settlers came.

ستيب STEP: تجميعات متكررة

20 الإجابات مع الشرح

52 D St. Lucia's geography

السبب القطعة تصف موقع الجزيرة وحجمها وسواحلها وجبالها وغاباتها؛ أي أن موضوعها الجغرافيا.

> *43 kilometres long and a maximum of 23 kilometres wide*

ليه الباقي غلط السياحة والثقافة والتاريخ تُذكر باختصار فقط.

53 C It has a small number of people.

السبب القطعة تقول إن عدد سكان الجزيرة منخفض نسبيًا.

> *The entire population of St Lucia is approximately 178,000 people, which is quite low.*

ليه الباقي غلط D يخص حجم الجزيرة وليس السكان.

54 A geothermal activity

السبب الكاتب يذكر البرك الساخنة والينابيع كمثال على النشاط الحراري الأرضي geothermal activity.

> *St. Lucia is famous for its geothermal activity; heat from the earth's center creates natural hot pools and springs*

21 علم الاجتماع
Sociology

ذكرها المختبرون 4 مرات
3 أسئلة

generally, learning sociology provides us with what sociologists call the sociological imagination. Sociological imagination is a particular way of looking at the world around us through sociological lenses. It is a way of looking at our experiences in light of what is going on in the social world around us. This helps us to appreciate the social and non-biological forces that affect, influence and shape our lives as individuals, groups, and communities. Sociological imagination helps us look beyond individual psychology to the many and varied facets of social and cultural forces, and "the recurring patterns in peoples' attitudes and actions, and how these patterns vary across time, cultures and social groups.

Learning sociology helps us understand how social forces influence our goals, attitudes, behavior, and personality. We become more sensitive towards the social issues. Furthermore, learning sociology helps to cast aside our own biased assumptions, stereotypes and ethno-centric thinking and practices to become more critical, broad-minded and respectful in our interpersonal and inter-group relationships. By learning sociology. We can be more humane and people-centered; we give high value to human dignity.

In general, sociology increases our self-knowledge. Learning sociology can provide us with self-enlightenment. When we learn sociology, we gain more knowledge about the conditions of our own lives, and about the way our society and social system function. As such knowledge increases, we can be more empowered to influence the direction of forces that affect our lives. For example, we can be more responsive to the various policies set by governments; and can suggest our own policy initiatives and alternatives.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

55 What is the main topic of the passage?

الفكرة الرئيسية

A Learning sociology helps us become ethno-centric thinkers.
B Self-enlightenment is a particular way of looking at the world.
C Learning sociology helps us understand the world and our place in it.
D Seeing the world through "sociological imagination" makes the world seem better.

ملف مجاني من تطبيق ستيب — Google Play و App Store

تفاصيل

56 **What important idea about the "sociological imagination" does the writer mention in paragraph (1)?**

A It helps us see how the situations and events around us affect our lives and the lives of others.

B It helps us think fairly, be open and honest, and treat others with kindness and respect.

C It helps us understand the reasons why we think and act the way we do.

D It helps us understand how government policies affect us, and how we can affect government

استنتاج

57 **Why does the writer mention government policies?**

A To give an example of how we can treat others more fairly.

B To give an example of how we can become more critical.

C To give an example of how social forces affect our beliefs.

D To give an example of how we can affect the forces in our lives.

21 الإجابات مع الشرح

55 **C Learning sociology helps us understand the world and our place in it.**

السبب القطعة كلها تقول إن دراسة علم الاجتماع تساعدنا على فهم القوى الاجتماعية، وعلى معرفة حياتنا ومجتمعنا ومكاننا فيه.

Learning sociology helps us understand how social forces influence our goals, attitudes, behavior, and personality ... we gain more knowledge about the conditions of our own lives, and about the way our society and social system function

ليه الباقي غلط A يعاكس القطعة التي تقول إن علم الاجتماع يبعدنا عن التفكير المتمركز حول العرق.

56 **A It helps us see how the situations and events around us affect our lives and the lives of others.**

السبب الفقرة 1 تقول إن الخيال الاجتماعي ينظر لتجاربنا في ضوء ما يجري في العالم الاجتماعي حولنا، فيبين القوى التي تؤثر في حياتنا وحياة الآخرين.

It is a way of looking at our experiences in light of what is going on in the social world around us. This helps us to appreciate the social and non-biological forces that affect, influence and shape our lives as individuals, groups, and communities.

57 **D To give an example of how we can affect the forces in our lives.**

السبب الكاتب يذكر السياسات الحكومية مثالًا على أننا بزيادة المعرفة نستطيع التأثير في القوى التي تمس حياتنا.

we can be more empowered to influence the direction of forces that affect our lives. For example, we can be more responsive to the various policies set by governments

23 الغذاء والخلايا والهرمونات
Food, Cells and Hormones

ذكرها المختبرون 4 مرات
3 أسئلة

(1) Our food is primarily made of carbohydrates, proteins, fats, minerals, vitamins and water. We need to regularly ingest food to sustain ourselves.

(2) Living things do not follow the pattern of decay seen in the rest of the natural world. Unlike non-living things (such as rocks), living things maintain themselves. They build new cells, tissues and organs in the process of development. Once mature, organisms can sustain existing biological structures by cellular division. This process, also called mitosis, allows cells to use molecules such as water, amino acids (building blocks of proteins), carbohydrates and lipids to create new cells. This process requires the transfer of energy among chemical bonds.

(3) Our cells are regularly being replaced and recycled and this requires a regular influx of energy and matter. We obtain energy in the form of food calories and new matter in the form of the molecules contained in our food. Not all of these molecules are digestible by all animals. These unneeded molecules may be eaten along with more desirable molecules. This is part of the reason why animals must have an opening in their digestive system.

(4) A balanced diet for humans includes several servings of breads, cereals, fruits and vegetables every day. Also essential are smaller servings of milk, dairy, meat and eggs. Fats, oils and sweets should make up a very small portion of a balanced diet.

(5) Human beings eat several hundred pounds of food a year. From this food we obtain all the molecules we need so our bodies can operate, grow and replace the cells lost to wear, old age, or damage.

(6) Animals, such as humans, have evolved intricate strategies of intercellular communication. Feedback, feed-forward, and inhibition allow us to maintain steady-state, or homeostasis. We get hungry because we want to eat. This seemingly simple cause and effect is the result of the empty stomach secreting the peptide hormone ghrelin into the bloodstream. When this hormone is received by the hypothalamus, it stimulates the release of growth hormones, which makes us want to eat. After eating to satiation, the release of the peptide hormone leptin causes the hypothalamus to inhibit hunger sensations. Leptin is released by a variety of tissues including adipose (fat cells), stomach, bone, pituitary, and the liver.

Metabolism

(7) The word metabolism comes from the Greek root "change" and involves the building up or breaking down of molecules to be used by the body. These molecules will be used for cell growth, fuel and other processes. If the process involves breaking down molecules into simpler ones, usually to release energy, it is called catabolic. If building up complex molecules, for structures or energy storage, it is called anabolic.

(8) Developed and less active bodies do not need as many energy calories as developing and active bodies. Developing bodies are adding cells at a rapid rate, and this requires an infusion of both new material (molecules) and energy. Active bodies, likewise, need more calories to sustain

ملف مجاني من تطبيق ستيب — Google Play و App Store

the energetic demands of more motion.

Proteins

(9) Proteins are molecules made of nitrogen, carbon, oxygen and hydrogen and sometimes sulfur. These molecules are found in animal tissue such as meat (including fish), eggs, cheese and legumes, and many other plant foods.

(10) Proteins are large molecules assembled from smaller units called amino acids and serve many important roles in living things. Amino acids are linked by covalent bonds called peptide bonds. Proteins can serve as enzymes, hormones as well as the building blocks of complex physical features. Proteins comprise teeth, bone, muscle, tendon, cartilage, skin-most of what makes up an organism.

(11) As enzymes, proteins facilitate chemical reactions that would not otherwise happen in the short time, or lower temperatures required by living things. As hormones (such as the previously mentioned appetite inhibitor leptin) they are protein messengers that deliver information around the body.

Carbohydrates

(12) Carbohydrates are made of hydrogen, oxygen, and carbon that combine to form monosaccharides. These simple sugars are made of five (pentose) or six (hexose) carbon rings. Additional hydrogen and oxygen atoms allow these rings to form disaccharides ("two sugars") such as sucrose and lactose or polysaccharides ("many sugars") such as starch.

(13) Sugars are essential to living things. They provide a way to store chemical energy to operate living things. They are also the structural backbone to the information storage molecules DNA and RNA, as well as many of the other essential molecules in living things. Sugars are transported through the blood stream in the form of the simple sugar glucose. They have 4 calories of energy per gram.

الأسئلة حلها بنفسك أولًا، والإجابات تحتها

62 **What two things happen to the cells in our body?** تفاصيل

A They divide and are digested
B They are replaced and recycled
C they are replaced and digested
D They build new cells and give energy

63 **What two things do cells use for mitosis?** تفاصيل

A water and dairy
B lipids and cereals
C amino acids and lipids
D amino acids and vegetables

ملف مجاني من تطبيق ستيب — Google Play و App Store

تفاصيل

64 What two hormones make people feel hunger?

A Ghrelin and growth hormones
B Leptin and ghrelin
C Ghrelin and peptide
D Hypothalamus and growth hormones

23 الإجابات مع الشرح

62 B They are replaced and recycled

السبب القطعة تقول إن خلايانا تُستبدل وتُدوَّر باستمرار replaced and recycled.

Our cells are regularly being replaced and recycled

63 C amino acids and lipids

السبب القطعة تقول إن الانقسام mitosis يستخدم جزيئات مثل الماء والأحماض الأمينية والكربوهيدرات والدهون lipids؛ والخيار C هو الوحيد الذي ذُكر كله.

This process, also called mitosis, allows cells to use molecules such as water, amino acids (building blocks of proteins), carbohydrates and lipids to create new cells.

ليه الباقي غلط باقي الخيارات فيها حليب أو حبوب أو خضار، وهذه ليست من المذكورات.

64 A Ghrelin and growth hormones

السبب المعدة الفارغة تفرز هرمون ghrelin، وهو يحفز إطلاق هرمونات النمو التي تجعلنا نريد الأكل.

the empty stomach secreting the peptide hormone ghrelin into the bloodstream. When this hormone is received by the hypothalamus, it stimulates the release of growth hormones, which makes us want to eat.

ليه الباقي غلط leptin يوقف الإحساس بالجوع بعد الشبع، فلا يجعلنا نجوع.

24 العولمة والفقر
Globalization and Poverty

ذكرها المختبرون 4 مرات
3 أسئلة

In the recent past, a handful of colonial rulers allowed wealth to be accumulated in the hands of a few. The great powers, in turn, enriched themselves lavishly at the expense of the colonized peoples who were subjected to poverty, hardship and deprivation. Because of these policies, poverty remained the lot of the majority. But now that globalization has become the frame of reference, there is no justification for an ever-smaller minority to become richer while the majority poor become even poorer. A situation in which one segment of the global population lives in opulence while most of the rest live in dire poverty is morally reprehensible. We can -- and in fact we must -- work to reduce the number of those who live in extreme poverty so that this will be a better world for all.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

تفاصيل
65 The frame of reference that can help solve poverty is _____

A education B technology C globalization D birth control

تفاصيل
66 What is considered to be a moral evil?

A the role of knowledge and behavior
B the rift between the rich and the poor
C the high agenda of the wealthy countries
D the development of many global concerns

مرجع الضمير
67 The words great powers in the passage refer to _____

A colonial rulers B colonized peoples
C accumulate wealth D global development

24 الإجابات مع الشرح

65 C globalization

السبب القطعة تقول إن العولمة صارت الإطار المرجعي الذي لا يبرر استمرار الفقر.

now that globalization has become the frame of reference

66 **B** the rift between the rich and the poor

السبب القطعة تصف الفجوة بين من يعيشون في رفاهية ومن يعيش أغلبهم في فقر شديد بأنها «مرفوضة أخلاقيًا».

> *A situation in which one segment of the global population lives in opulence while most of the rest live in dire poverty is morally reprehensible.*

67 **A** colonial rulers

السبب great powers هي الدول الكبرى التي كان حكامها مستعمِرين، والقطعة تقول إنهم أثروا على حساب الشعوب المستعمَرة.

> *a handful of colonial rulers allowed wealth to be accumulated in the hands of a few. The great powers, in turn, enriched themselves lavishly at the expense of the colonized peoples*

ليه الباقي غلط B هم الضحايا وليسوا القوى العظمى.

مدغشقر
Madagascar

ذكرها المختبرون 3 مرات

3 أسئلة

(1) Madagascar is an island country located off the south eastern coast of Africa. The island is the fourth largest in the world. Only Greenland, New Guinea, and Borneo are larger. Madagascar is known as the Great Red Island for its rich, red soil. Its capital is Antananarivo.

(2) Madagascar lies in the western India Ocean. The Mozambique Channel separates the island from the African coast. The central part of Madagascar is a plateau, or high, flat land. Mountains rise above the plateau in some places. Maromokotro Peak in the north is the island's highest point. It rises 9,436 feet (2,876 meters). A narrow plain runs along the east coast. Low plateaus and plains cover the west. Rivers are short and fast flowing in the east and longer in the west. The east coast has a hot, humid tropical climate. The central plateau is cooler. The southwest is dry.

(3) Grasses cover most of the island. Some tropical forests and mangrove swamps survive on the coasts. Hundreds of different kinds of orchid also grow in Madagascar. Madagascar has many types of animals that live almost nowhere else in the world. Two examples are lemurs and fossas. Lemurs are monkeylike animals that live in trees. Fossas are catlike mammals that hunt birds and lemurs. Many butterflies, chameleons, and crocodiles also live in the country.

(4) Madagascar's people are known as the Malagasy. The Malagasy are more closely related to Indonesians than to Africans, even though the country is closer to Africa than to Indonesia. The Malagasy are divided into about 20 groups. The Merina make up the largest group. The country also has small groups of people from Africa, Asia, France, and the nearby island country of Comoros. Many people of Madagascar speak both the Malagasy and French languages. About half of the people are Christian, and most of the rest follow traditional Malagasy religions. Fewer than one-third of the people live in cities. Almost all the major cities and towns are in the east.

5) Madagascar is a poor country. Most of the people live by growing crops and by raising humped cattle called zebu. Rice is the main food crop. Farmers grow vanilla and cloves to sell to other countries. Vanilla from Madagascar is thought to be the best in the world. Madagascar also produces coffee, sugar, and shrimp. Madagascar's small industries make mainly cloth, clothing, cement, soap, beer, and cigarettes. Mines provide cobalt, chromite, graphite, gold, and gems. Cobalt is the main product. The country 's share of world cobalt sales was nearly 4% in 1980.

6) People first came to Madagascar from Indonesia more than 1,100 years ago. Arab sailors arrived on the island in AD 1000. The Portuguese first came to Madagascar in 1500, and the French arrived and set up small towns so they could trade in the 1600s. The Malagasy Merina kingdom controlled much of the island in the early 1800s. The French defeated the Merina in 1895. France then ruled the island as a colony. The island became the independent Malagasy Republic in 1960. In the 1970s, the country's army took power. The country took the name Madagascar in 1975. In 1992, Madagascar held free elections for the first time in 17 years. The new government is working to improve the economy.

26 المكتبات العامة
Public Libraries

ذكرها المختبرون 3 مرات

4 أسئلة

(1) As online learning becomes more common and more resources are converted to digital form, some local governments suggest that public libraries should be shut down and, in their place, everyone should be given an iPad with an e reader subscription.

(2) Proponents of this idea believe that it will save local cities and towns money because libraries are actually expensive to maintain. Libraries require a lot of land and real estate to house various books and resources, which makes it somewhat expensive to maintain. They also think it will encourage more people to read because they won't have to travel to a library to get a book; they can simply click on what they want to read and read it from wherever they are. They could also access more materials because libraries won't have to buy physical copies of books; they can simply rent out as many digital copies as they need.

(3) However, it would be a serious mistake to replace libraries with tablets. Digital books and resources are associated with less learning and more problems than print resources. A study done on tablet versus book reading found that people read 20-30% slower on tablets, retain 20% less information, and understand 10% less of what they read compared to people who read the same information in print. Additionally, staring too long at a screen has been shown to cause blurred vision, dizziness, dry eyes, headaches, and eye strain, at much higher instances than reading print does. People who use tablets and mobile devices excessively also have a higher incidence of more serious health issues such as fibromyalgia, shoulder and back pain, and muscle strain.

(4) While replacing libraries with tablets may seem like a simple solution, it would encourage people to spend even more time looking at digital screens, despite the myriad issues surrounding them. It would also end access to many of the benefits of libraries that people have come to rely on. In many areas, libraries are such an important part of the community network that they could never be replaced by a simple object.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

71 Which of the following is the writer's opinion?

استنتاج

A Starring at a screen is unhealthy.

B People read slower on tables.

C Replacing libraries is a mistake.

D Online learning is common now.

ملف مجاني من تطبيق ستيب — Google Play و App Store

72 How is the writer's view about libraries different from some local government's view? استنتاج

A He thinks libraries provide various resources.
B He thinks libraries are expensive to maintain.
C He thinks libraries are important to the community.
D He thinks libraries should be replaced with digital ones.

73 What can we understand from paragraph (3) about print books? استنتاج

A They are a better learning resource.
B They are less expensive to buy.
C They are bad for your health.
D They make you read slower.

74 What can we understand from paragraph (2) about libraries? استنتاج

A They are NO longer needed.
B They have a lot of material.
C They encourage people to read.
D They cost a lot of money to keep.

26 الإجابات مع الشرح

71 C Replacing libraries is a mistake.

السبب: الرأي هو ما يعبّر عنه الكاتب: «سيكون خطأ كبيرًا استبدال المكتبات بالأجهزة اللوحية».

> *it would be a serious mistake to replace libraries with tablets*

ليه الباقي غلط: A و B و D معلومات ودراسات وليست رأيه الشخصي.

72 C He thinks libraries are important to the community.

السبب: الحكومات المحلية ترى أن المكتبات مكلفة ويمكن الاستغناء عنها، أما الكاتب فيرى أنها جزء مهم من شبكة المجتمع ولا يمكن استبدالها بشيء بسيط.

> *libraries are such an important part of the community network that they could never be replaced by a simple object*

ليه الباقي غلط: B و D رأي الحكومات المحلية وليس رأي الكاتب.

73 A They are a better learning resource.

السبب: الفقرة 3 تقول إن المصادر الرقمية ترتبط بتعلم أقل ومشاكل أكثر من المصادر المطبوعة؛ أي أن الكتب المطبوعة أفضل للتعلم.

> *Digital books and resources are associated with less learning and more problems than print resources.*

ليه الباقي غلط: D عكس المعنى: القراءة على الأجهزة اللوحية هي الأبطأ.

ملف مجاني من تطبيق ستيب — Google Play و App Store

74 **D** They cost a lot of money to keep.

السبب الفقرة 2 تعرض رأي المؤيدين: المكتبات مكلفة لأنها تحتاج مساحة وعقارات كثيرة.

> *libraries are actually expensive to maintain*

سؤال واحد

Alex: Hi Dave, do you want to come over for dinner, tonight?
Dave: Sorry Alex, I can't talk right now because I'm.....

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

تفاصيل

75 What is Dave's reply?

A working B looking C easy D fast

27 الإجابات مع الشرح

75 A working

السبب: الجملة ناقصة بعد because I'm، والكلمة المناسبة سببًا لعدم قدرته على الكلام هي working (مشغول بالعمل).

I can't talk right now because I'm

ليه الباقي غلط: easy و fast صفتان لا تناسبان بعد I'm هنا، و looking تحتاج حرف جر مثل for بعدها ولا تكمل المعنى هنا.

المجاعة الأيرلندية
Irish Potato Famine

ذكرها المختبرون 3 مرات

5 أسئلة

Irish Potato Famine

(1) Under British rule, three quarters of Irish farmland was used to grow crops that were exported. The potato was the main source of food for most of the Irish people. In 1845, disaster struck. A blight or disease destroyed the potato crop. Other crops, such as wheat and oats, were not affected. Yet British landowners continued to ship these crops outside Ireland, leaving little for the Irish except the blighted potatoes. The result was a terrible famine that the Irish called the 'Great Hunger'. In four years, about one million Irish men, women and children died of starvation or disease. Many more emigrated to the United States and Canada. The Great Hunger left a legacy of Irish bitterness toward the English.

(2) In the 1850s, some Irish militants organized the Fenian Brotherhood. Its goal was to liberate Ireland from British rule by force. In the 1870s, moderate Irish nationalists found a rousing leader in Charles Parnell. He rallied Irish members of Parliament to press for home rule, or local self-government. The debate dragged on for ages.

(3) The 'Irish question' disrupted English Politics. At times, political parties were so deeply split over the Irish question that they could not take care of other business. As prime minister, Gladstone pushed for reforms in Ireland. He ended the use of Irish tax money to support the British and tried to ease the hardship of Irish tenant farmers. New laws prevented landlords from charging unfair rents and protected the rights of tenants to the land they worked.

(4) Finally, in 1914, Parliament passed a home rule law. But it delayed putting the new law into effect when World War 1 broke out that year. The southern counties of Ireland finally became independent in 1921.

الأسئلة
حلها بنفسك أولًا، والإجابات تحتها

76 What does Paragraph (1) say about the Great Hunger?

تفاصيل

A It helped improve relations between Ireland and Britain.

B It made British landowners stop all crop exports outside of Ireland.

C It brought about a lot of death and made many Irish people leave their country.

D It helped Prime Minister Gladstone to become the leader of the Irish nationalists.

ملف مجاني من تطبيق ستيب — Google Play و App Store

77 How did the Irish deal with the problems that followed the great Hunger? تفاصيل

A They stopped paying taxes to the British and built an army.
B They passed laws to stop landlords from stealing their crops.
C They bought oat and wheat crops from nearby European countries.
D They created the Fenian Brotherhood to fight back against the British.

78 How did Prime Minister Gladstone deal with the Irish question? تفاصيل

A He arrested Charles Parnell and other Irish nationalists.
B He tried to help Irish farmers through new rent and tax laws.
C He left over a million Irish people to die of hunger and disease.
D He allowed Irish people to move to the United States and Canada.

79 Why does the writer use the word "Yet" in Paragraph (1)? استنتاج

A To prove that the Irish only liked to eat potatoes most of the time
B To give more information about which crops were sent to Canada
C To show that crops, like wheat and oats, were also affected by disease.
D To show that British landowners sold good crops while people were hungry.

80 What does the writer think about the "Irish question"? استنتاج

A He believes it divided English people and created problems until a solution was found.
B He believes it created a split between Ireland's northern and southern counties.
C He believes it helped the British control Ireland's farms and potato crops for a very long time.
D He believes it created bad feelings towards Irish people who supported the Fenian Brotherhood.

28 الإجابات مع الشرح

76 C It brought about a lot of death and made many Irish people leave their country.

السبب الفقرة 1 تقول إن حوالي مليون إنسان ماتوا بسبب الجوع والمرض، وهاجر كثيرون إلى أمريكا وكندا.

> *In four years, about one million Irish men, women and children died of starvation or disease. Many more emigrated to the United States and Canada.*

ملف مجاني من تطبيق ستيب — Google Play و App Store

77 **D** They created the Fenian Brotherhood to fight back against the British.

السبب بعض الأيرلنديين المتشددين أسسوا جماعة Fenian Brotherhood لتحرير أيرلندا من الحكم البريطاني بالقوة.

> *some Irish militants organized the Fenian Brotherhood. Its goal was to liberate Ireland from British rule by force.*

78 **B** He tried to help Irish farmers through new rent and tax laws.

السبب غلادستون دفع بإصلاحات: قوانين جديدة منعت الملاك من فرض إيجارات ظالمة وحمت حقوق المستأجرين، وأنهى استعمال أموال الضرائب الأيرلندية لدعم البريطانيين.

> *As prime minister, Gladstone pushed for reforms in Ireland ... New laws prevented landlords from charging unfair rents and protected the rights of tenants to the land they worked.*

79 **D** To show that British landowners sold good crops while people were hungry.

السبب كلمة Yet تفيد التعارض: المحاصيل الأخرى سليمة، ومع ذلك استمر الملاك البريطانيون في تصديرها بينما الناس جائعون.

> *Other crops, such as wheat and oats, were not affected. Yet British landowners continued to ship these crops outside Ireland*

ليه الباقي غلط C عكس القطعة التي تقول إن القمح والشوفان لم يتأثرا.

80 **A** He believes it divided English people and created problems until a solution was found.

السبب القطعة تقول إن «المسألة الأيرلندية» انقسمت حولها الأحزاب البريطانية حتى عجزت عن إدارة شؤون أخرى، إلى أن صدر قانون الحكم الذاتي سنة 1914.

> *At times, political parties were so deeply split over the Irish question that they could not take care of other business ... Finally, in 1914, Parliament passed a home rule law.*

3 أسئلة

29 المحاسبة غير القياسية
Non-Standard Accounting

(1) According to a recent study in The Analyst's Accounting Observer, 90 percent of companies in the Standard & Poor's 500 - stock index reported nonstandard accounting results last year, up from 72 percent in 2009.

(2) Regulations still require corporations to report their financial results under accounting rules. But companies often steer investors. instead to massaged calculations that produce a better outcome.

(3) Among 380 companies that were in existence both last year and in 2009, the study showed net income was up 6.6 percent in 2015 compared with the previous year when non-standard accounting was used.

(4) However, under generally accepted accounting principles, net income at the same 380 companies in 2015 actually declined almost 11 percent from 2014

(5) Another striking fact: Thirty companies in the study generated losses under accounting rules in 2015 but magically produced profits when they did the math their own way. Most were in the energy sector, which has been devastated by plummeting oil prices, but health care companies and information technology businesses were also in this group.

(6) How can a company turn losses into profits? By excluding some of its costs of doing business. Among the more common expenses that companies remove from their calculations are restructuring and acquisition costs, stock based compensation and write-downs of impaired assets.

الأسئلة

حلها بنفسك أولًا، والإجابات تحتها

81 تفاصيل

According to the text, what is one important effect of non-standard accounting?

A It reduces the cost of doing business.

B It increases the number of employees.

C It allows companies to choose the results they show.

D It has mainly helped companies that produce energy

82 تفاصيل

What is the reason for companies hiding some business costs?

A It makes them seem more successful.

B It is common when prices are falling.

C It is easier for them to do their own math.

D It gives them more time to pay for these costs.

ملف مجاني من تطبيق ستيب — Google Play و App Store

معنى كلمة

83 The word generally in Paragraph (4) is closest in meaning to _____

A finally B especially C quickly D usually

29 الإجابات مع الشرح

81 C It allows companies to choose the results they show.

السبب الشركات توجّه المستثمرين لحسابات معدّلة تعطي نتيجة أفضل، وبعضها حوّل الخسائر إلى أرباح بحسابه الخاص؛ أي أن الشركة تختار النتيجة التي تعرضها.

> *companies often steer investors. instead to massaged calculations that produce a better outcome*

ليه الباقي غلط D غير دقيق: الجملة عن الطاقة تخص 30 شركة فقط، أما C فيصف أثر هذه الحسابات على الشركات كلها.

82 A It makes them seem more successful.

السبب الشركات تحذف بعض تكاليفها من الحسابات فتتحول الخسائر إلى أرباح، فتبدو أنجح.

> *How can a company turn losses into profits? By excluding some of its costs of doing business.*

83 D usually

السبب generally = عمومًا أو في الغالب، أي usually؛ مثل المبادئ المحاسبية المتعارف عليها.

> *under generally accepted accounting principles*

30 الأوزون
Ozone

ذكرها المختبرون 3 مرات
3 أسئلة

Ozone

(1) Ozone is an undesirable secondary air pollutant in lower regions of the atmosphere. In contrast, ozone in the upper region of the atmosphere, called the stratosphere, has an important natural function. The ozone in the stratosphere screens Earth from harmful ultraviolet light. Ozone forms in the stratosphere through reactions of molecular oxygen that absorb radiation.

(2) Ozone molecules formed in the stratosphere absorb more than 90% of Ultraviolet radiation, including the higher energy ultraviolet light sometimes called UV-C and UV-B radiation. In this way, ozone serves to shield the lower atmosphere and Earth's surface from a significant fraction of high-energy UV light that is part of solar radiation. Ozone concentrations stay at relatively fixed levels because ultraviolet light also decomposes ozone molecules to reform oxygen molecules.

(3) The formation and decomposition of ozone produce a steady-state concentration of ozone within the stratosphere. This layer or region of ozone is sometimes called the ozonosphere, and a maximum concentration of about 10 ppm (parts per million) occurs in the stratosphere from 25 to 30 km in altitude.

(4) Recent observations of the ozone layer using rocket, high-flying aircraft and satellites revealed that the ozone concentration is dramatically decreasing, especially in the polar regions. This decrease in concentration is called thinning of the ozone layer, and larger decreases are called "holes" in the layer. The "holes" in the polar regions of Earth seem to vary with the seasons. The hole over Antarctica is most widespread from September to November, a time that corresponds to springtime in the southern hemisphere. In fall of 1998 the ozone hole over Antarctica was the largest ever observed up to that time. "Holes" have also been observed over the north pole and some industrialized regions of the northern hemisphere.

(5) A decrease in the ozone concentration allows more ultraviolet radiation to reach the surface of Earth. This increase in radiation causes damage to humans, other animals, plants, bacteria, and microscopic marine organisms (phytoplankton and zooplankton). For each 1% decrease in the ozone layer, there is a 2% increase in the UV radiation reaching Earth. It is estimated that a 2% increase in radiation may result in a 4% to 10% increase in basal-cell skin cancer and an 8% to 20% increase in more serious squamous-cell skin cancer, but the significance of these effects is not known.

(6) The thinning of the ozone layer appears to be a result of human activity. The chemical culprits are synthetic compounds containing chlorine, fluorine, and carbon known as chlorofluorocarbons or CFCs (also known as Freons). CFCs were developed in the 1930s. Over the years, they found use as coolant gases in refrigerators and air conditioners, as propellant gases in aerosol cans, as industrial solvents, and as foaming agents in plastic products like Styrofoam and cushion materials.

In the United States, they are no longer used in aerosol cans and other uses are being phased out. Halons, which are chemically similar to CFCs, find use in fire extinguishers and medical anesthetics. Halons also affect the ozone layer.

(7) Most gaseous pollutants that enter the atmosphere have a natural sink. The term sink refers to a long-term repository in the environment. A sink is some place or chemical form in which a chemical ends up. Normally, a pollutant is changed by some chemical reaction and is washed from the atmosphere by the rain. Sulfur dioxide and nitrogen oxides, for example, are transformed to sulfuric acid and nitric acid, which are carried to Earth as acid rain.

(8) One reason CFCs are used in products or as solvents is that they are very chemically inert. They are chemically stable, are nontoxic, do not support combustion, and are noncorrosive. Because CFCs are chemically inert and have no environmental sink, they are destructive to the ozone.

الأسئلة حلها بنفسك أولًا، والإجابات تحتها

84 What chemical is used in fire extinguishers? تفاصيل

A CFCs B Chlorine C Halons D Polymers

85 What is another name for "Chlorofluorocarbons"? تفاصيل

A freons B acids C Sulfur D halons

86 Around what percentage of Ultraviolet Radiation do ozone molecules absorb in the stratosphere? تفاصيل

A 90% B 80% C 20% D 10%

30 الإجابات مع الشرح

84 C Halons

السبب القطعة تقول إن مركبات Halons تُستعمل في طفايات الحريق وفي أدوية التخدير.

> *Halons, which are chemically similar to CFCs, find use in fire extinguishers and medical anesthetics.*

ليه الباقي غلط CFCs تُستعمل في التبريد والرذاذ، وليس طفايات الحريق.

85 A freons

السبب القطعة تقول إن مركبات CFCs تُعرف أيضًا باسم Freons.

> *chlorofluorocarbons or CFCs (also known as Freons)*

ليه الباقي غلط halons مركبات أخرى مشابهة كيميائيًا، وليست الاسم الآخر لـ CFCs.

ستيب STEP: تجميعات متكررة

86 A 90%

السبب جزيئات الأوزون في طبقة الستراتوسفير تمتص أكثر من 90% من الأشعة فوق البنفسجية.

Ozone molecules formed in the stratosphere absorb more than 90% of Ultraviolet radiation
